HENRY C. FORD

Professor of Latin and History Virginia Military Institute

LEXINGTON

†HARRIS HART

Superintendent of the Roanoke City Schools

ROANOKE

†FRANK T. WEST

Superintendent of Louisa County Schools

TREVILIANS

‡E. R. CHESTERMAN

Secretary of the Board

RICHMOND

*Successor to J. D. Eggleston—January 1, 1913.

†Successor to S. R. McChesney—April 1, 1913.

‡Successor to M. M. Lynch—April 1, 1913.

§Successor to R. C. Stearnes—January 1, 1913.

State Examiners and Inspectors

Examiners

JOHN H. BOOTON Superintendent Page and Rappahan- nock Counties.	J. R. L. JOHNSON Principal, Franklin, Va.
C. B. BOWRY Superintendent Amelia and Notto- way Counties.	G. G. JOYNES Superintendent Accomac County
J. T. FENTRESS Principal Chimborazo School Richmond	J. P. NEFF Superintendent City of Staunton
M. D. HALL Superintendent Fairfax County	W. G. RENNOLDS Superintendent of Essex and King and Queen Counties
J. N. HILLMAN Superintendent Wise County	D. H. RUCKER Principal Stonewall Jackson School Richmond
W. T. HODGES Superintendent Alexandria County	FRANK T. WEST Superintendent Louisa County
JAMES G. JOHNSON Superintendent City of Charlottes- ville	T. GILBERT WOOD Formerly of Sixth Congressional District Agricultural School, Forest, Virginia

State School Inspectors

*A. LUCIUS LINCOLN †JNO. B. TERRELL ‡E. E. WORRELL

Supervisor Colored Rural Elementary Schools

JACKSON DAVIS

*Succeeded T. S. Settle March 22, 1913.

†Appointed October 1, 1911.

‡Appointed October 1, 1911.

ERRATA

The name of Mr. F. B. Fitzpatrick, acting superintendent of schools of the city of Bristol, should appear in the list of State Examiners, printed on page 4.

Columns 19 to 27, inclusive, and columns 28 to 48, inclusive, of Table No. 4, which shows school population, number of schools, enrollment, attendance, etc., and which appears on page 148, may be found in the Appendix, beginning on page 476. This continuation of Table No. 4 shows the enrollment by ages and gives statistics as to high schools.

Annual report of the president.....	513
-------------------------------------	-----

Heretofore it has been the custom of the Department of Public Instruction to publish its reports biennially—that is, to include in one volume the reports of two years' work. In the future the plan of printing annually will be followed. This volume represents the new system, and includes only a report of the school year 1911-12. The printers, however, through an inadvertence, have left the word "biennial" on the folio, and hence its appearance at the top of these pages.

REPORT

OF THE

State Superintendent of Public Instruction

RICHMOND, VA., December 1, 1913

To the General Assembly of Virginia:

GENTLEMEN:

This statement and record of public school conditions in the State marks a change from the biennial system of reporting, which has obtained since 1891, and a return to the annual system. The biennial report has become unwieldy in size, and the unavoidable delay in issuing robs the figures of much of their significance.

TWO REPORTS DURING 1913

This first volume of the restored annual report brings the record down to July 1, 1912. I may remark in passing that this is the second report issued during this calendar year 1913, inasmuch as the biennial report of the two preceding years was delayed by changes in the organization of State school officials which compelled the clerical force of the Department of Public Instruction to devote its attention to other duties. I would like to add that we hope the annual report for 1912-1913 will appear in March or April of next year, though the last report of a division superintendent has just reached the Department of Public Instruction, and three months at least must elapse before all of the local reports can be digested, corrected and tabulated.

OFFICIALS OF DEPARTMENT OF PUBLIC INSTRUCTION

At the very outset I must bear hearty testimony to the earnest and faithful efforts of the ladies and gentlemen associated with me in the Department of Public Instruction. No body of public officials ever labored with more of the spirit of intelligent and sympathetic co-operation, and their long hours of toil day after day calls for grateful recognition at my hands and by the citizens of the Commonwealth at large. Money alone may purchase mere labor, but it cannot fully reward services in which personal interest is quite as prominent as mental or physical activity.

Special mention is due the talented and efficient head of the department, Mr. Evan R. Chesterman. To the mind of a scholar he adds the keen perception of a journalist, and to the heart of a student the executive ability of a man of affairs. Without his guiding hand two volumes of reports in one year would have been an impossibility.

I have summarized the records exhibited in Tables 1 to 7 (pp. 80-269; see appendix also) and compared the figures of 1911-1912 with the records of the two preceding years, according to our regular custom. For convenience these summaries are grouped together on the pages immediately

following this introduction, but I now proceed to discuss the figures and comparisons which they exhibit.

RECEIPTS AND DISBURSEMENTS

A school system which must educate 616,168 children living under conditions so complex as those which surround American youth in the twentieth century calls for a large outlay of public funds. Properly to finance the new vision and—shall I say?—ancient ideals of this proud Commonwealth is a more serious problem than many imagine. There is no longer a North, a South, an East or a West in either sentiment or competition or destiny. The Virginia boy lives next door to the boy from Washington State as well as the boy from Washington city.

VIRGINIA COMPARED WITH OTHER STATES

The struggles of the Virginia system were grossly unequal if financial resources alone were considered, but there is small ground to despair if we plant our faith upon honest effort and the disposition of our people to measure their zeal by the needs of the hour. I present, however, a concrete illustration to show by way of contrast the straightened circumstances under which we labor, and quote as follows from a recent article prepared by the State Superintendent of a Western State:

"Next is our financial system. We have set aside vast bodies of land for the support of the public schools. From the sale of these lands large sums of money accumulate. When a community decides to build a school it sells bonds. We buy the bonds out of the fund obtained through the sale of school lands. The interest accruing on these bonds goes to swell our school fund, from which we take more money to buy more bonds to allow the building of more schools—an endless chain. It will be perceived that we are not embarrassed at any time by that commonest of paralyzing effects, lack of money.

"Again, California has no 'backwoods' districts. We have school districts that are situated from fifty to one hundred miles from the nearest railroad station; but such a district has a teacher who is equal to those of the city schools, and is treated with exactly the same care that is bestowed upon the school most favored by circumstances and conditions."

"Glorious Utopia and star of the golden West!" exclaims the Virginian who reads the foregoing paragraphs about California. But let some one suggest that he leave his home, kindred and traditions, and then the Virginian can think of many things that compensate for modest living which is less oppressive among our people because it is so widely distributed. The really valuable lesson in the California situation is the fact that no school can be a "backwoods" school if it has "a teacher equal to those of the city schools." This must be brought to pass in Virginia by economy, zeal and co-operation.

1912 COMPARED WITH OTHER YEARS

I return to the figures of the first summary and find that Virginia's public school income during 1911-12 was \$5,616,964.16, a net gain of \$446,380.52 for the year, and a net annual gain of \$3,184,861.71 as compared with 1905.

In 1905 Virginia's total revenue for schools was \$2,432,102.45. In 1912 we spent that amount and \$759,410.64 besides on teachers' salaries alone. In addition we spent \$1,142,892.11 on good school buildings, compared with \$262,030.55 in 1905. Thus have we grown in wealth and liberal views of public school finance until we are now investing more than nine dollars per capita in preparing our boys and girls for life. No State throughout the entire North and West spends less than \$15 or \$18 per capita of school population, and the proud States of Washington and California pay respectively \$32 and \$27 per capita of school population for the education of their children. In 1910, when we were spending \$6 per capita, Maryland was spending \$10 and West Virginia \$11.

Much has been accomplished, but much remains to be done here in old Virginia.

RELATIVE AMOUNTS OF STATE AND LOCAL FUNDS

Of the entire 1912 revenue as given above \$1,869,697.06 was derived from State funds and \$3,747,267.10 from local funds. If the State school funds were made equal in amount to the local school funds we should be spending about \$12 per capita of school population. And even on that basis I am convinced that we could command the services of such a class of teachers in remote and one-room schools as would justify the State Superintendent in saying: "We have no 'back woods' school in Virginia."

This point is worthy of more than a passing thought. In 1878 Superintendent Ruffner said: "One-half of the support of the school system is expected from State funds; and just so far as this resource is cut off in the same proportion must the people be denied school privileges." On more than one occasion Dr. Ruffner emphasized his views that the State and local funds must bear the school burden equally.

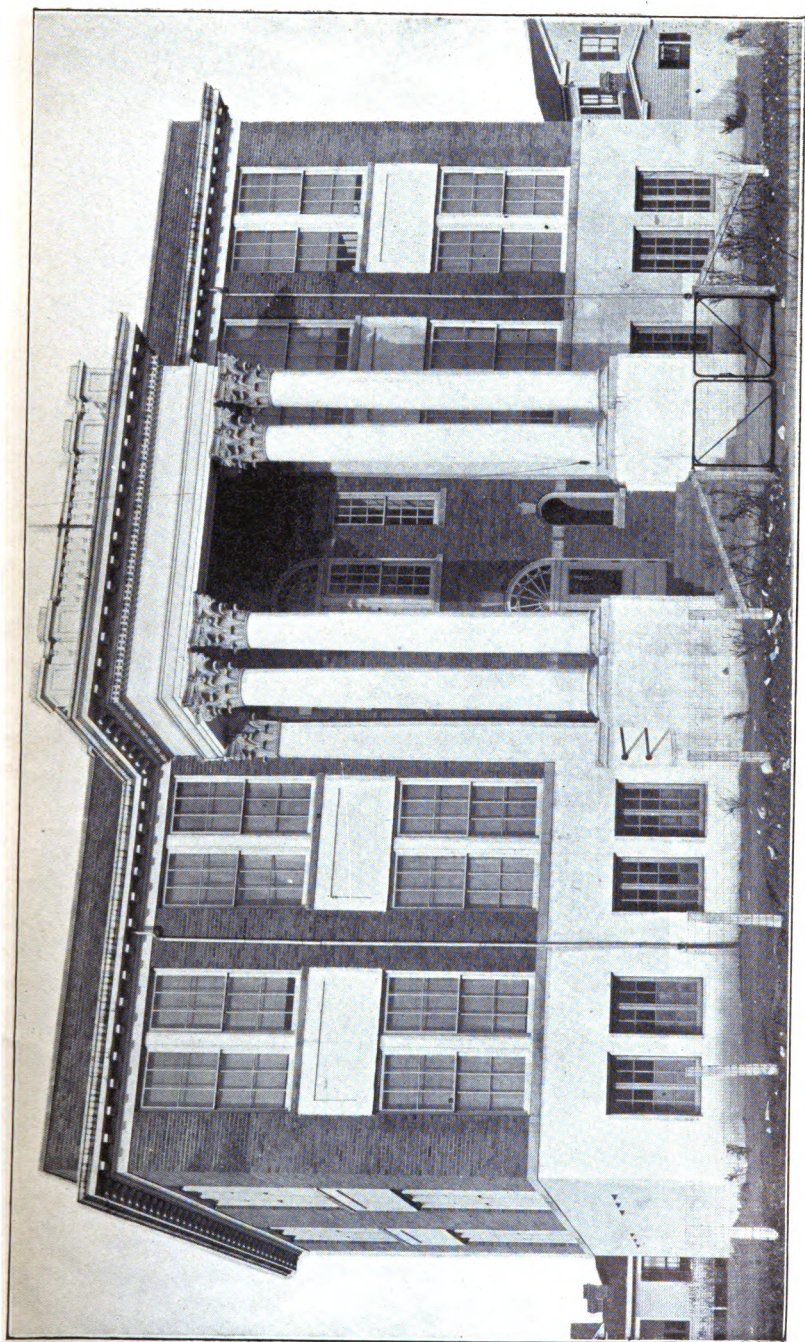

The Constitution voices the same opinion and demand when it says, first, that the annual State tax for schools shall not be less than one nor more than five mills on the dollar, and, second, that local school taxes in the aggregate shall not be more than five mills on the dollar.

STATE AND COUNTIES MUST BEAR BURDEN EQUALLY

Until 1905 this equalization of responsibility for the proper support of public education was observed, and the local school taxes that year exceeded State school taxes little, if any. As a rule, both rates of taxation were at the minimum, but the local school taxes began to grow until they are now four times as great on an average as State school taxes.

Virginia levies a State school tax at the lowest rate permitted by the Constitution, and does not construe the word "property" in the broad sense obviously intended by the makers of the Constitution. The practical result is to deprive the schools of any State taxes on the richest of property rights—those reached by means of license and franchise taxes. This I conceive to be a great defect and wrong.

It is interesting to learn that purely rural districts all over America are unable to provide proper school facilities by local taxes alone. Wealth gravitates to the towns as water tends to seek its level. The material

Ann Street Grammar School, Portsmouth.

resources of even the poorest rural sections seem to take wings and fly to the towns or cities. The crops go thither for storage or exchange, money seeks the vaults of town or city banks, and the giant share of advantages from railroads and other public utilities blesses the town rather than the country. In Massachusetts, probably, local taxation is depended upon in an exclusive sense to a greater extent than in any other State, for Massachusetts is a State of cities and towns. Nevertheless, I have heard a leading school official in Massachusetts speak of poor rural sections where State funds provided almost an entire school existence. One school mentioned received \$300 from local taxes and \$1,200 from State funds.

Cities and towns owe a great debt to rural life and uplift. They must not count the cost in a State-wide effort to provide good rural schools. Our State school funds must be largely increased before school officials can view the rural situation with equanimity and peace of mind. State school funds in Virginia are the very life blood of rural schools, particularly those of the one-room type.

ARCHITECTS' FEES

Two years ago the Legislature instituted an investigation to determine the amount of architects' fees. The results were inconclusive and unsatisfactory. The Department of Public Instruction determined at once to secure accurate information on this important matter, and I am pleased to be able to answer the question propounded by many legislators and citizens. In 1912 the State spent \$20,785.32 for architect fees. This amount was paid out almost entirely on large buildings, as the Department of Public Instruction furnished plans and specifications for two, three, four, six and eight-room houses without cost. Sixteen different designs and plans for schoolhouses have been prepared by the department at very low cost—a cost, indeed, which does not exceed \$40 per thousand copies of plans.

PUBLIC SCHOOL ACCOUNTING

Notwithstanding the positive language of the statutes and the resolute refusal of the General Assembly to permit the Department of Public Instruction to inquire into or supervise the settlement of local school accounts, an idea rather widely disseminated still prevails that the Department of Public Instruction is responsible in some way for local delinquencies or errors in settling public school accounts.

Our county and city treasurers and the local school officials are as a rule careful and accurate, I am constrained to believe, in making settlement of school accounts. This fact is a remarkable one to accountants who have been called upon to consider the complications and irregularities embodied in our patchwork of statutes.

INTRICACIES OF LOCAL ACCOUNTING

In making settlement with a county treasurer the school official or auditor must go to the records of the commissioner of the revenue, the county clerk's office and the State Corporation Commission to get his facts.

He must consider no less than five different rates of treasurers' commissions involving difficult calculations. He must consider collections prior and subsequent to December 1, must unravel the mysteries of five or six delinquent lists covering at least two years, must follow the tracks of those who purchase land for taxes, and must be prepared to look out for dog taxes, oyster taxes and local capitation taxes donated to the schools in some counties but denied in others.

If the school boards were given 90 per cent. of local taxes, as they are given 90 per cent. of State taxes, and the boards of supervisors were required to pay all treasurers' commissions and to look after all delinquent lists, public school settlements would be so simple that mistakes could hardly occur, and settlements by boards of supervisors would be no more difficult than they now are.

TREASURERS' COMMISSIONS

I make no warfare upon treasurers' commissions, as I happen to know that many of these worthy officials receive a very moderate return for the labors they perform. But among school men I hear no more caustic and persistent criticism than the comment made upon the fact that it costs our local school revenues in counties more than three times as much to collect and disburse the school moneys as it does to supervise the schools. In 1912 the county treasurers received \$103,056.74 from local school funds and county superintendents from the same source only \$30,680.91.

COST OF SUPERVISION AND COLLECTION COMPARED

In 1907 the county treasurers were paid \$60,055.30 in commissions from local school funds and city treasurers \$3,854.39. In 1912 the corresponding figures were \$103,056.74 and \$3,903.49. It will thus appear that the burden of collection in counties has almost doubled, while in cities it has increased less than fifty dollars. The fault is in the system. The city treasurers have no doubt enjoyed equal benefits with their brethren in the counties, but they have been paid in a way that takes the burden off the school funds. While our total school revenue increased 61 per cent. during this time, which increase proceeded almost *pari passu* in counties and cities, treasurers' commissions in counties increased 71 per cent.

I suggest for the benefit of the treasurers as well as the schools that simpler forms of settlement be devised, and that school funds be relieved of the charge for treasurers' commissions.

Let a small but perfectly definite deduction be made to cover delinquent lists and then have all commissions paid in one settlement by one board, to-wit, the board of supervisors, the money to come out of the general county fund and not out of school funds.

BETTER SUPERVISION

One could wish that the additional revenue which would thus accrue to the schools might be spent entirely in supervision. Apparently we are employing new teachers in 50 per cent. of our schools year after year. The

small salaries do not attract, and raw recruits in large numbers must be broken in. The need for more and better supervision is so obvious that absence of knowledge of the effects of good supervision in country schools is the only explanation of the apathy of our people and law-makers.

Beset by misunderstandings and misrepresentation, the State Board of Education has been struggling during the past five years to secure 103 experienced school men as division superintendents, and more than 50 per cent. of the force may now be classed as experts. The salaries were entirely inadequate. In fact, the salaries in 1908 were on the basis of non-expert supervision. The State Department of Education has encouraged the local boards of taxation and school administration to increase the salaries of division superintendents in accordance with the provisions of the new law of 1908. We have also given the superintendents positions in summer schools to get the grade of talent desired.

Many school systems do not ask any man or woman to supervise more than twenty-five teachers. How shall we explain a situation in Virginia which requires one man to supervise 290 schools? It means much to have fully one-half of our division superintendents appear in the class which is able to lead a corps of teachers in either a summer normal or a county institute. We must give serious heed to fostering and developing this department of our work.

NUMBER OF SCHOOLS—ENROLLMENT

The fourth and fifth summaries deal with the number of schools, the length of session, the enrollment and the attendance—four of the most important matters in school administration. Is there a sufficient number of comfortable school-houses? Are these houses open for use as many days and as many hours in the day as they should be? Are the children going to school? Do they attend with sufficient regularity to attain results? To be obliged to answer all of these questions in the negative is distinctly humiliating but altogether necessary.

CONSOLIDATION OF SCHOOLS

In 1906 we had in use 7,320 school-houses with 9,228 rooms; in 1912, 6,743 school-houses with 10,730 rooms—577 less houses, with 1,502 more rooms. During the same period the enrollment increased 33,967, and the average daily attendance 35,797.

Consolidation of schools is a modern thought in education. Some persons think it will solve the country school problem. With this view I cannot agree. On the contrary, I am sure that consolidation in some instances may be a grave mistake. No mere fiat of administration or plan largely mechanical in its nature will ever solve great school problems. We must still have the devotion of consecrated leaders, the personality of teachers and the sound common sense of prudent trustees.

A PLEA FOR THE ONE-ROOM SCHOOL

There are 5,014 one-room schools in Virginia and others are needed. If we might follow the California plan and give each of these schools as good

a teacher as the city schools have, what a marvelous transformation there would be in both curriculum and enrollment! Some children now enrolled in consolidated schools would fly to the one-room school for freedom and efficiency.

The consolidated rural school and the one-room rural school will continue. Both may be brought to a high state of efficiency, and there is no real conflict between them.

ADVANTAGES OF CONSOLIDATION

When all is said and done, however, there are certain advantages in the consolidated school which none may deny. Better grouping and grading, longer periods, teaching more specialized, the inspiration of numbers, lower cost per capita, the comforts of an assembly hall and the thought of a social centre, are real and tangible considerations which operate upon the minds and hearts of citizens within rural circles whose radii may equal as much as five or six miles. Sometimes local boards may overreach themselves or borrow too much money under the warm impulses of a progressive movement, but they err in such cases entirely on the right side, and consequent discomforts will be only temporary if forbearance prevails. For example, I have known of instances in which consolidation was followed by shortening the term of one-room schools, but I am constrained to believe that such ill effects have already disappeared or will disappear if the Legislature of 1914 will but grant the needed increase in State school funds.

SCIENTIFIC TEST OF CONSOLIDATION

An exhaustive study of enrollment, average attendance and high school development during the past eight years shows that great growth is apparent in every county of Virginia which has made a fight for better and larger schoolhouses. In those counties which still have one-room schools alone and no high school development I find apathy, stagnation and despair. Attention is invited to this study, which will be published as a pamphlet by the Department of Public Instruction.

It is not possible to provide good school-houses everywhere on a moment's notice, but when one realizes that Virginia is now spending one million dollars annually on school-houses, as compared with only about \$250,000 in 1905, one may get some idea of the immense lengthening of our stride.

ENROLLMENT AND ATTENDANCE

The school age in Virginia, unfortunately, is 7 to 19 instead of 6 to 20, as the majority of States have it. Our school population in 1910 was 616,168. If we say that our population 6 to 20 is 710,000, we are not far from the truth. Of this number 465,000, approximately, are white. To equal the records of the only States of the Union whose records are worth emulating, two-thirds of the entire (6 to 20) school population and not less than 71 per cent. of the native white population must be in school.

On this same basis we should have enrolled 473,000 in 1912, including 330,000 white pupils. This means that 63,603 children, including 37,192

white children, who should have been in school were out of school during the session 1911-1912. Average attendance suffered accordingly.

SMALL INCREASES IN 1911-1912

The white enrollment in 1911-1912 increased 3,985; the colored decreased 3,547; and the net increase for the year was only 438. The winter of 1911-1912 was one of the most severe in the recent history of the State, and this no doubt accounts in a measure for the poor showing in enrollment and attendance.

LARGE INCREASES IN 1912-1913.

At the date of this writing I am privileged to look forward into the record of 1912-1913, and I find there increases of over 17,000 in both enrollment and attendance—the largest increase in enrollment in the history of the State. This I attribute in no small measure to the attention given to one-room schools and remote localities in 1912-1913. We awoke to the fact that while encouraging large plants was a good thing, we could not afford to neglect the small units.

OUR SCHOOL PLANT

When one inquires whether we have room to accommodate the 37,192 white and 26,411 colored children who are out of school, one learns from the fourteenth summary that we have a seating capacity in white schools greater by 41,798 than the enrollment. In the colored schools, on the contrary, the seating capacity is reported as being 13,064 less than the present enrollment.

Our colored school plant is clearly inadequate, and I must confess that I do not believe the white school plant is by any means so nearly sufficient as the official figures would indicate. I fear the superintendents in giving seating capacity have also included "standing room." And as long as it is stated that only 904 of our school buildings have modern systems of ventilation, we see the danger of relaxing our efforts to provide a modern school plant embracing upwards of 7,000 school-houses, located at central points, surrounded by ample grounds and provided within and without with conveniences to promote the physical, mental and moral well-being of the children.

I shall speak particularly of the situation among the colored people at another point, though I am convinced that I can aid the colored people most effectively by arousing the white people of the State on statistics affecting their own children alone—statistics which they can no longer disregard if presented in bold relief.

OUR ARMY OF ILLITERATES

Closely related to a discussion of school enrollment is the question of illiteracy. According to the United States census Virginia's illiteracy in 1910 was 8 per cent. among whites, 30 per cent. among negroes, and 15.2

per cent. for the State at large. The corresponding figures for 1900 were 11.4 per cent. whites, 44.6 per cent. colored, and 22.9 per cent. in all. Progress is indicated, but is it too much to hope that 1920 will find us practically free from the curse of illiteracy between the ages of ten and twenty?

We have about 81,000 white persons above ten years of age and 149,000 colored persons who can neither read nor write. Is it not imperative that we bring the children into school and get about our work as promptly as possible?

I give in this report a digest showing the illiteracy in each county and city of the State according to the figures gathered by the United States census enumerators and our own clerks of school boards.

WHAT IS THE REMEDY?

There are only two methods of bringing children into the schools—attraction and compulsion. I doubt whether the time is yet ripe in Virginia for compulsory education. Only two counties and three cities have taken advantage of our local-option compulsory education law, and all of these divisions except one, too recently to test the effects. In Alleghany county, which has the distinction of being the pioneer in taking advantage of compulsory education, there have been increases affecting white children during the past eight years as follows: Enrollment, 33 per cent.; average daily attendance, 42 per cent. Alleghany now enrolls 77 per cent. of its white school population, and is regarded as a model county by many of the citizens of neighboring counties.

Virginia's law as to compulsory education is a very weak affair at best. Under the Constitution it applies only to children between eight and twelve, and the following are excepted: "Such as are weak in body or mind, or can read and write, or are attending private schools, or are excused for cause by the district school board."

Virginia will have compulsory education ultimately, but there are very good reasons why the idea should be approached gradually and the people given time to discuss it in all of its phases and bearings.

In the meantime we must use the law of attraction to the very limit of its powers. More active supervision, better school-houses, attention to remote places, and the highest grade of teaching talent in one-room country schools, as well as in graded schools, will give us an enrollment and attendance almost, if not quite, equal to that reported by many States which have compulsory school laws.

CHILDREN SIX YEARS OLD SHOULD BE ADMITTED

Before leaving the subject of enrollment and attendance, I beg to urge that children six years of age be admitted to the schools. While the Constitution speaks of ages seven to nineteen as constituting "the school population" to form a "basis for apportionment of State school funds," I can see nothing in this provision to prevent the Legislature from admitting children six years of age without payment of tuition. Our sixth summary shows that more than one-third of the total enrollment of the schools are from seven to

nine years old, and the lapse in enrollment in 1904 and 1905, when the new law went into effect, must have alarmed every friend of our public school system who was not advised of the cause.

HIGH SCHOOLS

The growth of high schools is really a sign of the times. Virginia, like many another State, did not take kindly to the public school idea at first.

We are told that when Horace Mann took hold of the school situation in Massachusetts in 1837 there was no supervision and the class spirit prevailed almost entirely in the schools. The wealthy patronized private schools, and as a result the public schools too frequently degenerated into makeshifts for the poorer classes. The teachers were poorly paid and poorly equipped, the school term was short, and of the building a New England poet has said:

"Still sits the schoolhouse by the road
A ragged beggar sunning;
Around it still the sumachs grow
And blackberry vines are running."

It was this undesirable and undemocratic condition of things that Horace Mann remedied. He set out, in his own language, "to restore the good old custom of having the rich and the poor educated together, and to that end he desired to make the public schools as good as schools could be made, so that the rich and the poor might not necessarily be coincident with the educated and the ignorant."

This is the new vision which has come to Virginia. The founding of nearly every rural high school in the State means the civic realization of some community in which vigorous young fathers and mothers, feeling in their veins the rich flow of success in life, demand a generous routine of training and discipline for their children. Modern ideals make the individual willing to share these benefits with his neighbors, and the result is a public high school instead of an exclusive private academy. It seems to me that the high school movement in Virginia will die only when this new democracy fails and men begin to argue once more for the divine right of kings.

During the seven years preceding July, 1912, Virginia had established 390 new high schools and the enrollment had increased from about 7,500 to 17,886.

The State high school fund is no longer adequate to the demands of the situation, and should be increased to \$150,000.

AGRICULTURAL AND NORMAL TRAINING DEPARTMENTS IN HIGH SCHOOLS

In 1911-1912 the State supported departments of agriculture, manual training, and domestic science in ten high schools and departments of normal training in twenty-three high schools, as will appear more at length in the twenty-first summary. I shall treat these special lines of effort separately, taking up the normal training departments first.

The list of 606 teachers which the normal training departments furnished to the State in 1911-1912 speaks more eloquently than any words of mine could speak of the splendid success of these departments. There is a peculiar charm and vigor in the young high school graduate who has had one year of normal training, and superintendents everywhere bear grateful testimony to the success achieved by these young people.

Two hundred and seventy-eight pupils pursued the normal training courses in 1911-1912. The cost to the State was only \$15,000, and I strongly recommend the increase of this fund so that new departments may be established.

Of the departments of agriculture, manual training and domestic economy I cannot speak so encouragingly, and yet I know they represent a movement which is sound in principle.

The respective departments of agriculture, as they are commonly called, were established to serve the needs of the ten congressional districts, and each has been left to work out its own destiny. The normal training departments, on the other hand, were established to meet the needs of a county, and they have been managed under a comprehensive plan and a regular course of study formulated in the Department of Public Instruction. The agricultural departments now realize the need of the comprehensive plan and course of study, and they know that they cannot reach an entire district without changing their policies.

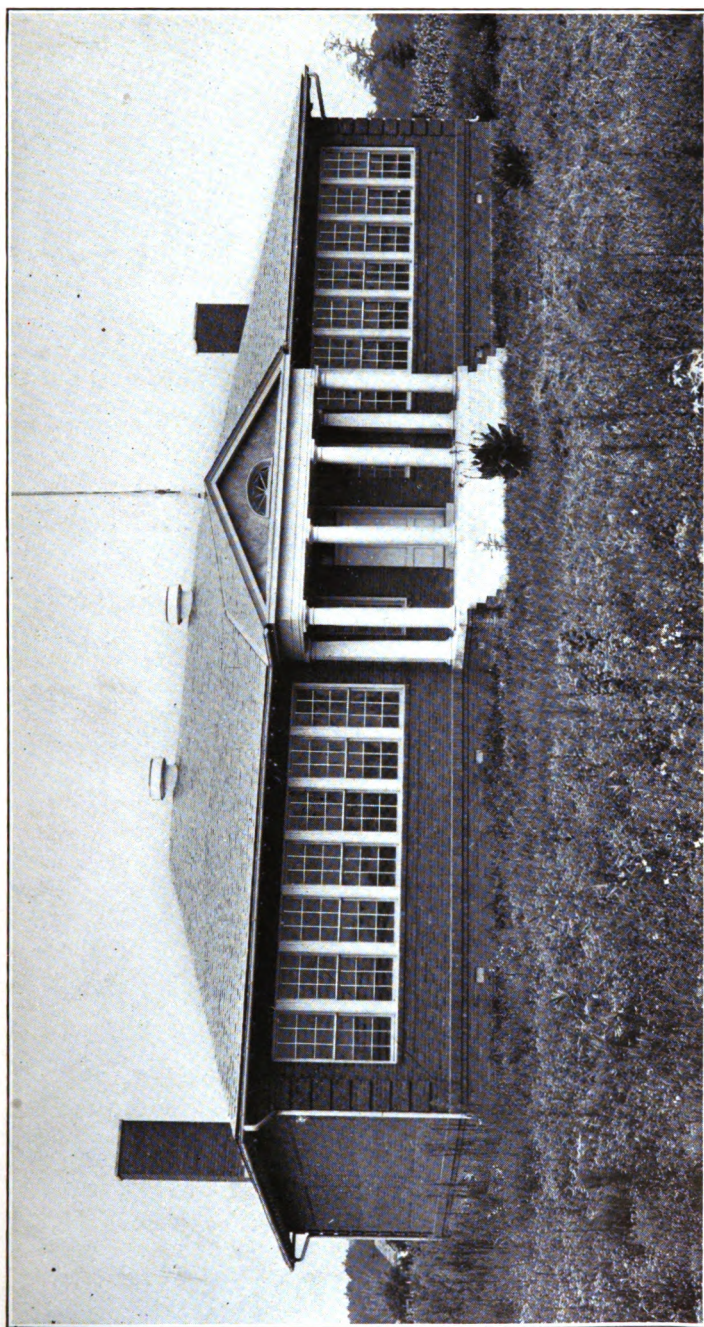

An enthusiastic meeting of the principals and teachers of the agricultural high schools was held at Burkeville in October, 1913, and another at the Educational Conference in Lynchburg. A committee was appointed to prepare a definite course of study for all of these schools, with sufficient elasticity and privilege of election to preserve that individuality which environment and varied agricultural conditions must suggest.

DORMITORIES FOR AGRICULTURAL HIGH SCHOOLS

The agricultural high schools can never perform the desired function of ministering to the needs of an entire district until dormitories are provided. Boys of moderate means must find comfortable quarters at reasonable rates or they will not attend. If eight or ten thousand dollars were expended at each agricultural high school for a dormitory and teacher training were emphasized somewhat after the fashion prevailing in the normal training departments, I am satisfied that these schools would recommend themselves to the partial favor of an entire district, as the high school normal training departments now chain the admiration and grip the sincere regard of all of the citizens of many a county.

Again, there is a certain practical type of extension work to be done by these "regional" high schools in connection with farmers' institutes, local poultry exhibits, and the demonstration work among boys and girls. Carrying the school to the people should be an effort equally as dear and distinguished as carrying the people or their children to school.

Pursuing the same idea of making the school concretely and tangibly serviceable in the practical affairs of life, one is impelled to hope that something of the spirit of the folk high schools of Denmark may be diffused

Oakwood Colored School, Norfolk County.

among all of our agricultural high schools—that spirit which says to young and old alike, to the farmer or the housewife: “Come to us for help in the everyday duties of life as well as in the higher efforts to satisfy your souls with knowledge and beauty.”

THE FOLK HIGH SCHOOLS OF DENMARK

In the Danish folk high schools two courses are offered each year—a four months' course in winter for young men and a three months' course in summer for young women. These institutions do not strongly emphasize the acquisition of text-book information, but try to arouse the intellectual life of the students, to start new forces operating in their lives, to make them want to live more efficiently and nobly, and to teach how to do so. Co-operation everywhere is most carefully inculcated—co-operation in agriculture, in buying and selling, and in political and social life. Greatest emphasis, probably, is laid on history, biography, and literature, while chemistry, physics and biology are also favorite studies.

DORMITORIES NEEDED

Returning to a discussion of our own high schools, I beg to say that dormitories are indispensable to either of the plans I have suggested for wider usefulness in these schools. Students from a distance either within or beyond the borders of the county in which such schools are located are equally interested in having dormitories provided.

The State of Virginia contributes \$32,000.00 annually to agricultural departments in high schools.

The total number of regular high schools in 1911-1912 was 468, an increase of 34, and the number of pupils enrolled was 18,012, an increase of 1,541.

TEACHERS

The schools were in session 61,858 more days in 1911-1912 than in the preceding year. If there had been no increase in the number of schools this record would have produced an increase of nearly six days in length of session. The salaries of teachers were increased \$252,777.40 in 1911-1912 as compared with 1910-1911; if there had been no increase in the number of teachers this record would have produced an increase of nearly \$24.00 per annum in the average salary paid teachers. But there were 218 new school rooms opened and 337 new teachers employed. These circumstances so far absorbed and accounted for the increased number of days the schools were in session and the larger amount paid teachers that the average annual session was lengthened only three days and the average annual salary was increased less than fifteen dollars.

The increased salaries went, as a rule, to teachers holding the better grades of certificates. White teachers holding second and third grade certificates were paid lower salaries than the year before, and the same was true of colored teachers holding third-grade certificates.

The total number of teachers was 11,017, and of this number 7,185 held certificates of a rank equal to or greater than a first grade. This means an increase of 418 in the number of high-class certificates. The number of emergency certificates among white teachers was diminished by 48, but among colored teachers unfortunately it was increased by 96.

Virginia is now paying her highest class of white teachers an average salary of \$546.05 per annum, and the next class—those holding first grade or high school certificates—\$320.68. The higher grades of certificates among colored teachers show corresponding increases and relative amounts.

Averages do not always exhibit a true picture of specific conditions. The average may be low when high salaries prevail in many cases. Some persons err in believing this to be true in Virginia. Viewed from the rural standpoint, some of the salaries paid in cities and towns appear to be sufficient, at least. But I maintain that the low average salary paid Virginia teachers is truly descriptive in every part of the State and under all conditions of city, town or rural life. I have seen principals whose meager salaries of \$1,500 a year enabled them to make ends meet in a growing family only by the practice of rigid economy—economy so rigid as to be absolutely unknown to other teachers whose annual compensation did not exceed \$400. Indeed, our salaries are so widely and universally insufficient as to make it safe for one to assert that negro teachers in Virginia, if they hold a certificate of high grade, are as well paid relatively as their white friends holding the same grades of certificate.

This is pre-eminently an age of mental and moral hysteria, in which (to quote Webster's definition of hysteria) "emotional and reflex excitability are so often exaggerated that the patient loses control over his emotions and becomes the victim of imaginary sensations, often falling into paroxysms or fits." Nowhere is this tendency more clearly exemplified than in the matter of teachers' salaries. Citizens write long articles deploring the low average of teachers' salaries and shed many tears over the small pay received by school men and women at some distant point, while at home they permit the instructors of their own children to be less efficient by 25 per cent. on account of financial worries, and take no interest in advancing them to the privileged positions occupied by the minister and the family physician.

Average salaries will take care of themselves if the people of this Commonwealth in their several towns, cities and communities will but honor at home the calling of teacher as it should be honored, and will but make their own teachers comfortable in body by adequate salaries and less drudgery, comfortable in mind by proper recognition and sympathy, and comfortable in spirit by omitting, as far as possible, the hasty word of censorious criticism.

The good teacher of necessity is frequently in a state of high nervous tension, and deserves the greatest consideration at all times.

Wherever Virginians really desire good schools they will secure good teachers. There is no middle ground. The good teacher makes the good school. Neither is there any middle ground on the score of salary. The greatest economy is to pay enough to command the services of a first-class teacher. Virginia is wasting not less than a million dollars annually by employing teachers at the lowest possible wage.

CORPS OF TEACHERS BETTER THAN EVER BEFORE

The record of our teachers on the score of training and professional spirit looms up in a grand light when one studies the twelfth summary, where we give the number of college and normal school graduates who taught for us during the session of 1911-1912. Including 1,119 persons who, while not graduates, had nevertheless attended college courses for one or more years, we find that nearly 50 per cent. of our teachers had the benefit of these higher spheres of training. The numerical increase over the preceding session was 1,316. In other words, Virginia had 35 per cent. more teachers who were specially trained in 1911-1912 than in 1910-1911. If an average increase of \$15.00 per annum in salary accomplished so much, what would adequate salaries accomplish?

I can discover only one weak spot in the record of the teachers, viewing it in the large. The subscribers to the *Virginia Journal of Education* during the session referred to numbered less than those of the year before by the very large difference of 918.

It is easy enough to sympathize with a body of men or women until one enervates them; it is easy enough to persuade teachers to accept small favors until one pauperizes them. I do not wish to concede any teacher so much as to say that she may be excused from subscribing to her State school journal or from attending teachers' meetings, and when the teachers justly demand better salaries, it is but the refinement of cruelty to dole out a few stipends for days spent in attending institutes or summer schools and say: "Depart in peace, be ye warmed and filled."

I wish to energize and organize the teachers of Virginia—not to enervate or pauperize them. And I say that one of the saddest sights I ever witnessed was the response to an appeal for a State school journal when only five out of fifty or sixty teachers were willing to subscribe. Those teachers simply did not know how much they needed that paper and how much it could do for them in a pecuniary sense.

SUMMER NORMAL SCHOOLS.

The summer normal schools continue to grow in numbers and efficiency. In pursuance of the policy insisted upon by the Legislature of 1906, those schools have been scattered throughout the State. We now have twenty summer schools and their wide distribution probably saves the teachers \$10,000.00 in railroad fares alone.

Our summer schools are conducted with the utmost economy, but it seems impossible to bring the total expense below \$50,000.00. Of this amount the Legislature furnishes only \$18,000.00. I renew the recommendation of my predecessor that the State pay the entire cost, but I also recommend that the Department of Public Instruction be relieved of the duty of conducting summer schools at the State normal schools and the University of Virginia. It is an anomaly to require the board of visitors of a State institution to conduct its affairs for ten months and then to introduce a new management for what is essentially a summer session of the same school, with many of the same professors, etc, etc.

It would be difficult indeed to overestimate the importance of summer schools. In addition to the recreation and relaxation which they furnish regular teachers by change of scene and the society of others who cherish like desires and hopes, nearly four thousand persons take advantage of the instruction they provide to earn original certificates or improve the grade of the certificates they already hold. For the bright young man or woman who cannot afford to be in school during the regular term, or for the teacher who desires to supplement a too limited training, the summer school is the door of hope and of advancement. The inspiration which it furnishes to the great body of teachers, the mutual and professional uplift which breathes in its very atmosphere, the opportunity to learn the latest and best methods in education may not be obvious to the uninitiated, but such advantages mean everything to the real teacher.

I refer with pride to the fact that Virginia is now able to furnish so many of the instructors in its summer schools. Nothing shows more clearly the higher professional skill of our division superintendents than the fact that more of them are in demand as instructors in summer schools than are able to respond to the call. Many of our teachers also find in the summer schools an opportunity to use their special talents, add to their slender incomes, and improve themselves in other branches while they are not employed in their own departments.

HIGHER INSTITUTIONS

To this introduction which has already covered more pages than the limits which I set for myself at the beginning, I would like to add discussions of the work of the various schools placed directly under the control of the Department of Public Instruction, of the various associations comprehended in the Virginia Educational Conference, of the work of the State inspectors and supervisors, of the *Virginia Journal of Education*, of the negro schools, of the contributions by educational agencies whose gifts extend to every Southern State—I would like also to refer to many other features which our summaries and reports epitomize in figures full of meaning to Virginia legislators and teachers, but I shall postpone such discussions for the annual report of 1912-1913, which must be prepared during the next five or six months.

I cannot refrain, however, from saying a word in reference to the higher institutions of learning.

Education is one body. The high school cannot say unto the normal school, I have no need of thee; nor again the common school to the university, I have no need of thee. I shall plead the cause of the elementary school in season and out of season, but never at the expense of higher instruction.

Education is like a tree; it grows largely from above. Indeed, it grows upward into the air and downward into the soil. If the highest branches of the tree fail in their functions, by so much will the lowest rootlets be found non-effective.

Membership in the various State boards of visitors has impressed me with the careful management of our State schools. The salaries paid our college professors are pitifully meagre in some cases, and all expenses are scaled to the lowest limits.

For example, I have heard good men suggest a reduction in the State's appropriation to the University of Virginia. But if they would pause to reflect that salaries in the University have not been increased these thirty years, and that every vacancy emphasizes the embarrassment of the Rector and Board of Visitors because the University must lose the services of brilliant men who find the salary offered not attractive or absolutely insufficient, they would quickly alter their views.

A COLLEGE FOR WOMEN

More than eighty per cent. of our teachers are women. Our people desire to educate their daughters even more than their sons. Two girls graduate from our high schools to every boy. We can never call our public school system complete with its one University for men, one normal college for men, four normal schools for women and its high schools and elementary schools. We must establish a woman's college in the modern acceptation of that term. I strongly recommend to the favorable consideration of the General Assembly the proposed co-ordinate college for women near the University of Virginia. The greatest good to the greatest number is wrapped up in this idea, and the wonder is that we have delayed so long in what appears to be a plain duty.

CONCLUSION

While it has fallen to my lot to prepare this introduction, I may not forget the associations and pleasant official relations of the days when the record of 1911-12 was actually in the making. I was then Secretary of the State Board of Education and Honorable Joseph D. Eggleston was Superintendent of Public Instruction. Mr. Eggleston's worth is known and applauded throughout the Commonwealth, but I venture the assertion that year by year Virginians will study more carefully and value more intelligently the splendid record of this public servant who was, indeed, a pioneer in pleading for the richer and nobler features of modern school life—in demanding adequate school revenues, good schoolhouses, and a school life closely associated with real life. Therefore, in a spirit consonant with the policies of my friend and predecessor, I shall close this introduction by again asking the Legislature for large increases in the common school fund. The money is sorely needed and the Commonwealth is well able to make this larger investment for the childhood of the coming generation. And a large investment it will surely be considered, for I fancy no thoughtful person now regards a school levy as a tax.

R. C. STEARNES.

Public School Funds

FIRST SUMMARY

Receipts

	1909-'10	1910-'11	1911-'12
State school and capitation tax.....	\$1,040,098 18	\$1,027,828 66	\$ 1,157,238 64
Cash appropriation by General Assembly.....	455,000 00	445,000 00	445,000 00
State appropriation for high schools.....	100,000 00	100,000 00	100,000 00

18-20		3,209	3,039	2,948
Total	217,790	119,541	120,459	117,495
Grand total	616,198	401,568	409,448	411,208

SEVENTH SUMMARY

High Schools and Higher Branches

	1909-'10	1910-'11	1911-'12
<i>Number of high schools:</i>			
Four years' course, First Grade.....	127	141	152
Three years' course, Second Grade.....	109	116	154
Two years' course, Third Grade.....	123	113	114
One year's course.....	83	64	48
Total	399	434	468
<i>Enrollment according to schools:</i>			
In first grade high schools.....	9,027	10,735	10,506
In second grade high schools.....	8,024	2,943	4,300
In third grade high schools.....	2,502	1,940	2,362
In high schools having a one-year course.....	781	853	845
Total	15,334	16,471	18,012
<i>Enrollment according to classes:</i>			
Number of pupils in fourth year classes.....	1,182	1,301	1,613
Number of pupils in third year classes.....	2,118	2,445	2,790
Number of pupils in second year classes.....	4,170	4,519	4,904
Number of pupils in first year classes.....	7,864	8,206	8,705
Total	15,334	16,471	18,012
Amount of State high school fund distributed.....	\$ 101,375 00	\$ 93,400 00	\$ 99,250 00
<i>Number of children studying high school branches in both high and grammar schools:</i>			
White	20,591	23,562	19,380
Colored	2,752	2,561	698
Total	23,343	26,123	20,068

EIGHTH SUMMARY

Number of Teachers

	1909-'10	1910-'11	1911-'12
White males	1,527	1,404	1,466
White females	6,523	6,374	7,110
Colored males	536	521	496
Colored females	1,868	1,831	1,943
Total	10,443	10,630	11,017
Average enrollment to each teacher.....	86.4	89.3	87.2

NINTH SUMMARY

Number of Teachers According to Certificates

	1900-'10	1910-'11	1911-'12
<i>Certificates—White teachers:</i>			
Special certificates or certificates higher than first grade	1,481	1,626	1,821
First grade or high school	3,846	3,942	4,097
Second grade	1,702	1,691	1,764
Third grade	413	421	351
Emergency	610	602	554
Total	8,052	8,282	8,587
<i>Certificates—Colored teachers:</i>			
Special certificates or certificates higher than a first grade	339	389	407
First grade	885	810	860
Second grade	436	512	513
Third or fourth grade	358	400	267
Emergency	373	287	383
Total	2,391	2,398	2,430

TENTH SUMMARY

Average Monthly Salaries

	1900-'10	1910-'11	1911-'12
White teachers, all grades.....	\$ 43 95	\$ 45 31	\$ 46 73
*Colored teachers, all grades.....	28 53	28 33	27 97
White teachers, male.....	56 90	61 44	63 30
White teachers, female.....	40 96	41 72	43 31
Colored teachers, male.....	31 25	32 19	32 24
Colored teachers, female.....	27 75	26 85	26 88
White and colored, male.....	51 42	59 97	55 76
White and colored, female.....	36 39	39 10	40 15
All teachers	40 82	41 73	42 97

*Decrease due to a falling off in number of colored male teachers.

ELEVENTH SUMMARY

Average Annual Salaries

	1900-'10	1910-'11	1911-'12
<i>Certificates—White teachers:</i>			
Special certificates or certificates higher than first grade	\$ 511 38	\$ 538 36	\$ 546 06
First grade or high school certificates.....	290 74	306 72	320 68
Second grade	186 37	183 07	187 28

Number built during year.....	215	247	227
Number enlarged during year.....	83	68	48
Amount expended on new buildings.....	\$ 458,666 99	\$ 832,908 03	\$ 823,371 89
Amount expended on repairs.....	121,147 35	107 142 59	96,507 33
Amount borrowed from literary fund.....	117,147 00	164,572 00	175,905 00
Amount borrowed by bond issues.....	109,772 85	225,672 00	169,822 18
Number rooms in all.....	10,443	11,141	11,434
Number wagons for transporting pupils.....	171	200	118
Number buildings containing three rooms or more.....	665	743	823
Number buildings containing two rooms.....	870	938	926
Number having one room.....	5,308	5,157	5,614
Number of houses for white schools.....	5,022	4,951	4,661
Number of houses for colored schools.....	1,867	1,878	1,873
Seating capacity of white schools.....	317,391	330,967	334,006
Seating capacity of colored schools.....	98,913	104,388	103,953

FIFTEENTH SUMMARY

School Grounds and Buildings

	1909-'10	1910-'11	1911-'12
<i>Number buildings having—</i>			
Half acre or less.....	1,626	1,469	1,360
Half acre to one acre.....	1,199	1,158	1,276
One acre to two acres.....	3,290	3,309	3,203
Two acres or more.....	728	902	904
Total	6,843	6,838	6,743
Number with suitable grounds.....	5,337	5,437	5,351
Number with grounds enclosed.....	915	925	946
Number with outhouses.....	4,191	4,545	4,621
Number with good furniture.....	4,626	4,800	4,919
Number with patent desks.....	4,011	4,421	4,564
Number having modern system of ventilation.....	603	715	904
Number painted.....	3,037	3,367	3,624
Number in good repair.....	4,984	5,067	4,903
Number in which during year pupils or parents have improved grounds.....	2,427	2,687	3,138

SIXTEENTH SUMMARY

Value of School Property and Unpaid Obligations

	1909-'10	1910-'11	1911-'12
Value of school property.....	\$8,555,343 60	\$9,281,975 41	\$11,111,992 00
Debts due for all purposes.....	932,039 70	1,291,171 26	1,432,046 48

SEVENTEENTH SUMMARY

Number of Pupils Supplied With Text-Books by Districts.

	1909-'10	1910-'11	1911-'12
White	2,618	2,728	2,974
Colored	1,296	900	1,047
Total	3,914	3,628	3,721

EIGHTEENTH SUMMARY

Work of Supervising Officers

	1909-'10	1910-'11	1911-'12
Number of days employed by division superintendent in visiting schools.....	8,153	7,520	7,228
Other school duties.....	16,362	16,172	15,066
Total	24,515	23,692	22,294
Number visits to schools.....	33,643	32,782	33,892
Number schools not visited.....	1,107	1,116	1,187
Number schools visited only once.....	3,461	3,368	3,677
Total number of hours spent in school rooms while visiting	23,927	22,472	23,750
Number teachers or other educational meetings attended by superintendent.....	1,366	1,335	1,276
Number school board meetings attended by sup't.....	2,545	2,568	2,569
Visits by trustees.....	10,551	10,750	10,179
Visits by examiners.....	513	398	191

NINETEENTH SUMMARY

Record of Teachers' and Citizens' Associations

	1909-'10	1910-'11	1911-'12
Number of local teachers' meetings or institutes—white.....	1,129	1,323	1,000
Attendance of same.....	21,345	23,625	31,776
Number of local teachers' meetings or institutes—col'd.....	302	401	473
Attendance of same.....	5,004	6,848	9,008
Number of local educational (citizens') meetings.....	869	974	1,111
Attendance of same.....	68,181	71,747	109,352
Number of local teachers' associations.....	325	322	312
Number of local citizens' leagues.....	424	720	696

TWENTIETH SUMMARY

Special Days Observed and Libraries

	1909-'10	1910-'11	1911-'12
Number of schools (rooms) observing Patrons' Day.....	3,759	4,120	5,438
Number of schools (rooms) observing Arbor Day.....	969	1,331	1,160
Number of schools (rooms) having libraries.....	2,692	3,064	3,669
Number volumes in same.....	150,830	191,120	220,473

TWENTY-FIRST SUMMARY

State Appropriations to Agricultural and Normal Training Classes in High Schools

AGRICULTURAL CLASSES

SCHOOL	COUNTY OR CITY	AMOUNT

MRS. LUCIE B. DUDLEY.

Negro Reformatory

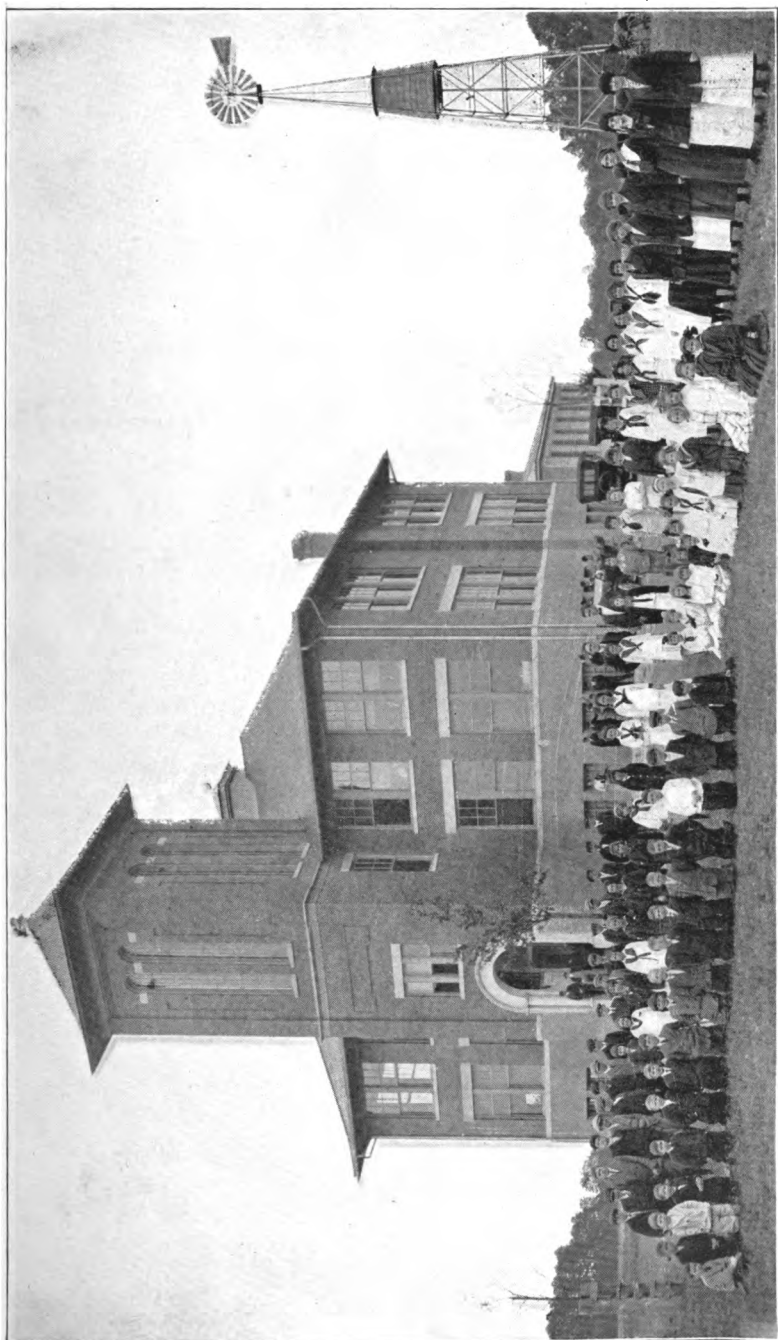

ARTHUR F. TATE, MILDRED V. PRICE.

**Annual Report of Supervisor Rural Elementary Schools for the
Year Ending July 31, 1912.**

JACKSON DAVIS, *Supervisor.*

The plan of employing supervising industrial teachers for the negro rural schools, so successful in its earlier demonstrations in Henrico, Gloucester and other counties, has continued to meet with favor and encouragement. Through the co-operation of the Jeanes Fund Board, Hampton Institute, the division superintendents and school boards, in the session of 1911-12 seventeen supervising industrial teachers were employed for the negro schools of eighteen counties. One teacher did work in two counties.

The following is a statement of the work done in each county:

Agricultural High School, Second Congressional District, Driver, Nansemond County.

WORK OF SUPERVISING INDUSTRIAL TEACHERS IN THE NEGRO RURAL SCHOOLS IN EIGHTEEN COUNTIES

HOME GARDEN AND CANNING CLUBS.

One of the most interesting developments of the work is the co-operation of the supervising industrial teacher with the farm demonstration agent in working during the summer months with clubs of girls who raise home gardens and can the vegetables and fruits of the gardens for winter use. This feature of the work was begun two years ago in four counties. During the summer of 1912 it was carried on in eight counties. Under this plan the industrial teachers were employed for twelve months, and at the close of the school term they organized girls' home garden clubs. They visited the girls in their homes, met them in groups, gave them practical instructions for their gardens, and taught canning, cooking and sewing in the homes. In many ways the summer work of these teachers has proved of even greater value than this work with the schools, for they are touching directly the homes of the people and bringing about changes that are having a far-reaching effect for better living.

The following statement shows the work accomplished in the eight counties in the summer of 1912:

WORK OF INDUSTRIAL TEACHERS WITH GIRLS' GARDEN AND CANNING CLUBS—MAY-SEPTEMBER, 1912.

Had lessons in sewing each week with club girls.
Planted flowers. Held entertainments for school improvement.
Homes generally whitewashed. Cooking lessons given in five homes to mothers.
Besides the canning and cooking lessons, sewing, cutting and fitting, crocheting, drawn work and basketry were taught.
Hints on housekeeping, personal neatness and cleanliness were given to both cooking and canning clubs.
Nearly every home visited whitewashed. Three neighbors gave entertainments to raise money for cooking outfits.
Lessons given in cooking, sewing, table manners and serving meals.
Each girl fixed up her yard, planted flowers and tried to make her home more attractive inside. Several girls raised poultry. Many homes whitewashed.

The supervising teachers had a meeting at Hampton at the time of the Farmers' Conference, January 31-February 1, and sixteen of them were present. Each brought exhibits of industrial work from the schools of their respective counties. Each saw the work of the others and exchanged ideas and experiences in several informal conferences, besides attending the farmers' exhibits and meetings. The State superintendent and several division superintendents were present at this meeting and greatly encouraged the teachers.

COLORED STATE TEACHERS' ASSOCIATION.

February 22-23. The Colored State Teachers' Association and School Improvement League met in Lynchburg. This body had been organized for some years, but the meetings were held in the summer and were very poorly attended. Through the good work of the officers and the cordial interest of the majority of division superintendents, who saw that their negro teachers were represented, this was the best meeting of this body ever held. President E. A. Long reported 190 teachers enrolled and paid their dues, and 240 teachers and others present; thirty-four county and city leagues enrolled and paid their fee, a distinct gain over the eighteen of last year. The meeting was representative, and an inspiring story of co-operation and progress was given by the delegates from the different county associations.

•HEALTH DAY

In the eighteen counties in which the industrial teachers worked, February 12th was observed by the negro schools and leagues as health day. The work was directed by the State Health Department. The industrial teachers went over the Tuberculosis Catechism with the teachers and they taught it to their pupils and patrons, and distributed copies sent out by the department. About 15,000 negroes received this instruction.

SUMMARY

During the year I attended eleven teachers' meetings, eighteen public meetings in the interest of schools and seven county exhibits and fairs. I visited all of the colored summer schools and gave lantern lectures at four. I also visited many of the white summer schools.

I spoke in the interest of my work before the students of the University of Virginia, the College of William and Mary and the Theological Seminary at Alexandria. I also led one of the classes in the study of the negro at the Southern Student Conference at Black Mountain, N. C.

Respectfully submitted,

JACKSON DAVIS,
Supervisor Rural Elementary Schools.

VIRGINIA STATE TEACHERS' ASSOCIATION

Officers 1911-1912

President—DR. J. P. MCCONNELL, Emory.
 Secretary—ALGAR WOOLFOLK, Richmond.
 Treasurer—MISS MAUD D. HOBBS, Petersburg.

VICE-PRESIDENTS

First Congressional District.....GEORGE W. GUY, Hampton
 Second Congressional District.....JAMES HURST, Norfolk
 Third Congressional District.....J. H. BRENT, Barton Heights, Richmond
 Fourth Congressional District.....GEORGE E. BENNETT, Petersburg
 Fifth Congressional District.....C. S. WHEATLEY, Danville
 Sixth Congressional District.....F. B. FITZPATRICK, Roanoke
 Seventh Congressional District....DR. ORMOND STONE, University of Virginia
 Eighth Congressional District....WILLIAM A. ANDERSON, Alexandria
 Ninth Congressional District....F. B. KEGLEY, Wytheville
 Tenth Congressional District....B. T. NEWTON, Cartersville

EXECUTIVE COMMITTEE

All of the above-named officers and--

MRS. M. S. MOFFETT, *President Department of Rural Teachers.*

REPORT OF MEETING OF SCHOOL TRUSTEES' ASSOCIATION,
 RICHMOND, NOVEMBER 27-28, 1912

The meeting of the School Trustees' Association, held in Richmond November 27-28, 1912, in connection with the Virginia Educational Conference, was pronounced by State Superintendent J. D. Eggleston, who addressed the trustees, as the most successful in the history of the organization.

Professor W. H. Whiting, Jr., of Hampden-Sidney College, the president of the association, occupied the chair, and Mr. W. B. Dougherty, of Norfolk, acted as secretary. The following is a summary of the proceedings:

JOHN MARSHALL HIGH SCHOOL BUILDING

Wednesday, November 27, 3 P. M.

Report of officers; appointment of committees; "Medical Inspection in the Counties," Dr. L. T. Royster, Norfolk, Va.; "Agriculture in Our Public Schools," Hon. George C. Round, Manassas, Va.; Professor H. F. Button, Manassas, Va. Discussions.

Thursday, November 28, 9 to 11 A. M.

"Some Financial Problems of Interest to School Trustees: (a) Commission Allowed the County Treasurers; (b) Trustees' Allowance for Service and Expenses; (c) Average Monthly Cost Per Pupil in a Graded School," D. C. Graham, Bridgewater, Va.

"Should a Teacher Failing to Live Up to Contract Without Sufficient Excuse Be Blacklisted?" W. H. East, Churchville, Va.

"Some Defects in Our Laws Which Operate to the Detriment of the Schools," Howard C. Gilmer, Pulaski, Va. Discussions.

November 28, 11 A. M.

Address, Hon. Richard Evelyn Byrd, Speaker of the House of Delegates of Virginia; address, Hon. Henry St. George Tucker, Lexington, Va.

November 28, 2:30 P. M.

Report of committees; election of officers (H. C. Rice, Blackstone, president; John R. Morton, Meherrin, secretary and treasurer).

"School Fairs," W. W. Gardner, Bedford, Va.

"With Conditions as They Are in Our Rural Districts Is It Wise to Consolidate Our Country Schools?" R. G. Koiner, Staunton; D. T. Meadows, Lone Oak, Va.

"The Care of School Property in Rural Districts," N. E. Clement, Chatham, Va.

"What the Schools Need in the Southwestern Section of Our State," J. B. Crabtree, Richlands, Va. Discussions.

Respectfully submitted,

ROSEWELL PAGE,
Second Auditor of Virginia.

Examination Questions

Uniform Examinations for Teachers' Certificates

MAY, 1912

SCHEDULE FOR EXAMINATIONS

First Day

- 8:40 to 9:00—Filling in Forms E, No. 2—Writing to be graded on Forms E,
No. 2
9:00 to 10:40—Geography
10:40 to 12:40—Grammar
12:40 to 1:40—Intermission
1:40 to 2:20—Orthography
2:20 to 3:40—Theory and Practice
3:40 to 5:00—Civil Government

Second Day

- 9:00 to 9:45—Drawing
9:45 to 12:00—Arithmetic
12:00 to 1:00—Virginia History
1:00 to 2:00—Intermission
2:00 to 3:00—Physiology
3:00 to 4:30—United States History

Third Day

- 9:00 to 10:45—Algebra
10:45 to 11:30—Reading
11:30 to 1:00—Science
1:00 to 2:00—Intermission
2:00 to 3:30—History, English or General

SPELLING

1. Add "ing" to tame, and give the rule.
 2. Add "ing" to sit, and give the rule.
 3. Add "ness" to busy, and give the rule.
 4. Add "ness" to pale, and give the rule.
- Select any two from above.

Words

- | | | | |
|-------------|----------------|----------------|----------------|
| 1. gingham | 9. conscious | 17. anticipate | 24. zephyr |
| 2. jovial | 10. sentiment | 18. conciliate | 25. embarrass |
| 3. parcel | 11. discreet | 19. serenade | 26. chivalrous |
| 4. utensil | 12. separate | 20. colonnade | 27. sacrifice |
| 5. expel | 13. nullify | 21. glycerine | 28. antique |
| 6. faucet | 14. tractable | 22. leprosy | 29. compass |
| 7. mudilage | 15. pavilion | 23. suspicion | 30. barricade |
| 8. martyr | 16. courageous | | |

GRAMMAR

Teachers may take any ten of the twelve blocks of questions.

- Give the case and construction of each *italicized* word:
 - He, being a *foreigner*, was ineligible to office.
 - He stood an *hour*, staff in hand.
 - Then give *him*, for a soldier meet,
A soldier's *cloak* for winding-sheet.
- Select the correct form, and give the reason for your choice:
 - Let John and (he, him) do the work in their own way.
 - Do you know (who, whom) they elected?
 - Do you know (who, whom) they will elect?
 - (Who, whom) do they take me to be?
- Name the relative clauses and give their construction in the following sentences:
 - What man has done, man can do.
 - This is the book that you wanted.
- Write a sentence (1) with an attributive adjective in the superlative degree; (2) with an appositive adjective; (3) with a simple predicate adjective; (4) with an objective predicate adjective. Underscore the adjectives.
- Write sentences using each of the following verbs in the present perfect tense:
Lie (to recline), lay, sit, see.
- Inflect (1) the past tense singular, emphatic form, of *study*; (2) the future perfect tense, plural progressive form, of *study*; (3) the past subjunctive singular of the verb "*to be*"; (4) the past indicative, common form, of *set*.
- Tell whether the *italicized* words are participles, or nouns, and give the construction (use) of each:
 - The smoke came *pouring* in.
 - He set the top *spinning*.
 - I saw you *sitting* in the house.
 - I enjoy the *singing* of birds.
- Distinguish in meaning between the following pairs of sentences:
 - Let me tell you a story of Dr. Brown.
 - Let me tell you a story of Dr. Brown's.
 - He shall have a new suit tomorrow.
 - He will have a new suit tomorrow.

9. Underscore the subordinate clauses in the following sentences, and give their uses or constructions:
 1. Invite whomever you see.
 2. It is true that the earth is round.
 3. Vines are pruned that they may bear more fruit.
 4. He made a promise that he would return soon.
10. Give the mode of each *italicized* verb with reason:
 1. *Love* not sleep lest thou *come* to poverty.
 2. Unless he *consent*, we can do nothing.
 3. If a house *be divided* against itself, it cannot stand.
 4. If gold *is* more precious than silver, it is less useful.
11. Write a sentence (1) with a prepositional phrase used as an adverb; (2) with a prepositional phrase used as an adjective; (3) with an infinitive phrase used as the subject; (4) with an infinitive phrase used as the object of a preposition.
12. Write a brief biography of your own life.

GEOGRAPHY

Select any eight of the following questions:

1. Name two examples of each of the following coast and relief forms: Projections, Indentations, Connectives, Elevations, Depressions.
2. What are the influences that affect climatic conditions? What use may be made of the environment and experience of your pupils in studying these conditions?
3. Name and locate the natural divisions of Virginia and give the leading pursuits and products of each.
4. Draw an outline map of Virginia and locate Richmond, Norfolk, Lynchburg, Roanoke and Charlottesville, and name the products manufactured in each.
5. Locate New York, St. Louis, Chicago, San Francisco and New Orleans. Which of these are important railroad centres, and why?
6. (a) Compare the mountains and rivers of the eastern and western United States. (b) Name the main rivers composing the Mississippi river system.
7. (a) Name five ports on the Atlantic coast of the United States. (b) Name five ports on the Great Lakes.
8. (a) What countries are important rivals of the United States in the production of wheat, cotton, cattle, manufactured goods. (b) Name the great commercial countries of Europe.
9. Compare the Congo and Amazon valleys, and account for their likeness or dissimilarity.
10. Discuss the following points about China: Surface and drainage; climate; products; people.

THEORY AND PRACTICE

Select any eight of the following ten questions:

1. What physical defects should the teacher be able to detect in pupils and seek to have corrected?

2. What constitutes the proper assignment of a lesson?
3. How may self-activity be encouraged in the pupil and how is it often suppressed?
4. What incentives would you use to secure punctual and regular attendance?
5. Point out the advantages of immediate rather than delayed punishment for offenses.
6. The teacher's voice is an important element in discipline. Show how this is true.
7. How should the teacher prepare the pupil's mind to receive the new ideas of a lesson?
8. What preliminary arrangements would you make for the opening day?
9. Besides the school, what other influences are helping to educate the child?
10. Distinguish between sense-perception and apperception.

CIVIL GOVERNMENT

Select any ten of the following twelve questions:

1. Give the powers and duties of the Governor of Virginia.
2. Why is a national government necessary?
3. Why do we have the committee system in our State and national legislative bodies?
4. Explain fully how the President of the United States is elected.
5. What are the three chief principles of taxation?
6. How is the Constitution of the United States amended?
7. (a) How are the judges of the circuit courts in Virginia chosen? (b) How are those of the federal courts chosen?
8. What are the qualifications for a voter in Virginia?
9. Trace how a bill introduced in the Virginia legislature becomes a law.
10. What determines the number of the board of supervisors in each county in Virginia? Name the chief duties of this board.
11. State chief differences between a town and a city in Virginia.
12. How many compose the State Board of Education and how are they elected?

ARITHMETIC

Select any ten of the following twelve problems:

1. What will it cost for rails for 5 miles of double track, if the rails cost \$28 a ton and weigh 100 pounds per yard?
2. One man can do a piece of work in 8 days and another can do it in 10 days, how many days will it take the two together to do the work?
3. A corner lot has 96 feet front and is 180 feet deep. Find the cost of laying a 4-foot stone walk on the front and one side, at 18c. per square foot.
4. A man has 5-8 of his property invested in a farm, 1-6 in railway stock, and the remainder, \$1,500, deposited in a bank. Find the value of the farm and of the railway stock.
5. Two men start from points 33 miles apart and walk towards each other, the first at the rate of 4 1-2 mi. per hour, and the second at the rate of 3 3-4 mi. per hour. How far from where the second man started will they meet?

6. If a dealer pays \$9,737.50 for wool, including the purchasing agent's commission of 2 1-2 per cent., how much is the amount of the commission?
7. The sugar contained in the sugar beet is 6 1-4 per cent. of the weight of the beet. How many pounds of beets will be required to produce 122 1-2 pounds of sugar?
8. A bell weighing 1,250 pounds is composed of 77 per cent. copper, 21 per cent. tin and the rest zinc. How many pounds of each metal does the bell contain?
9. A company with a capital of \$350,000 earned net \$28,250 last year. It paid a 7 per cent. dividend and carried the balance to surplus. How much did it carry to surplus?
10. Find the cost of 325 boards 16 feet long, 4 inches wide and 7-8 inch thick at \$27 per M.
11. A horse tied to a stake can reach the grass 30 feet in any direction from the stake. Over how many square feet of land can the horse graze?
12. Find the interest on \$960 from November 16th to the following August 27th, at 6 per cent.

DRAWING

1. Name ten objects that can be drawn in which the circle is the leading line.
2. Make drawing in pencil or ink mass of the red maple in May foliage.
3. What arguments would you use in convincing a parent that learning to draw is a benefit to his child?
4. What two colors would you mix together to make green?

PHYSIOLOGY AND HYGIENE

Select any seven of the following eight questions:

1. (a) In what way do decaying teeth influence the general health of the body? (b) Write a paragraph on the proper care of the teeth, emphasizing its importance.
2. Discuss the most frequent cause of indigestion.
3. (a) Write a paragraph on outdoor sleeping. (b) Discuss the importance of proper school furniture.
4. Discuss the cause, cure and prevention of malaria.
5. Describe the struggle between the body and germs.
6. (a) What are bacteria? (b) Of what use are they to man?
7. (a) Name four bacterial diseases of the human body. (b) Name two intestinal diseases of the human body.
8. (a) Discuss as applied to digestion the old rule, "After dinner rest a while." (b) Why does the physician look at the patient's tongue?

VIRGINIA HISTORY

(Do not write more than 100 words on any question.)

Select any eight of the following ten questions:

1. Give a brief sketch of the period suggested by the following: Berkeley, Old Dominion, Cromwell, Nathaniel Bacon, Burning of Jamestown.

2. Tell of Governor Spotswood and the "Knights of the Golden Horseshoe."
3. (a) Sketch briefly Washington's early life and (b) Virginia's part in the French and Indian War.
4. Give briefly the causes leading up to the American Revolution, showing the development of the spirit of liberty in Virginia.
5. Tell of Virginia's part in the Revolution.
6. Tell of the work of Jefferson and Mason in the framing of the Government.
7. Give a brief account of Stonewall Jackson's Valley Campaign, naming the principal engagements.
8. Sketch the condition of Virginia at the close of the Civil War and during the "Reconstruction Period."
9. When was the State public school system established, and what has the State done to foster public education since 1900?
10. Tell of the development of the farming interests of the State since 1865, and give briefly your views on the work that can be done by the schools to improve rural conditions and keep the boys on the farms.

UNITED STATES HISTORY

Select any eight of the following ten questions:

1. Show how the needs of commerce led to the discovery of America.
2. By what right did England claim territory in North America? What was the extent of the territory claimed by England?
3. State the results of the French and Indian War. Show its relation to the Revolutionary War.
4. Name four important battles of the Revolution and tell the results of each.
5. What was Washington's foreign policy? Its effects?
6. In whose administration was the first tariff law enacted? Tell something of subsequent and present tariff legislation.
7. Give the causes and results of the Mexican War.
8. Tell something of the history and importance of the Panama Canal.
9. Name the Presidents of the United States who have been assassinated. Tell why each was assassinated.
10. Name four American inventors whose inventions have revolutionized our social conditions.

ALGEBRA

Select any seven of the following problems:

1. Simplify: (a) $(a-2x)(b+3y) + (a+2x)(b-3y)$.
(b) $a^2-b^2-(a-b)^2$.
2. Factor: (a) a^4-1 ; (b) a^7-2a^6+a .
3. Solve for values of x : (a) $x^2-40=24$; (b) $x^2+63=16x$.
4. (a) Find H. C. F. of: $9-n^2$ and n^2-n-6 .
(b) Find L. C. M. of: x^2-y^2 , $x^2+2xy+y^2$, and $x^2-2xy+y^2$.

5. (a) Reduce to lowest term $\frac{4a^2-9x^2}{8a^3+27x^3}$

$$x - \frac{1}{x}$$

(b) Simplify

$$1 + \frac{1}{x}$$

6. A merchant bought 62 barrels of flour, part at \$4¾ per barrel, the rest at \$5½ per barrel. If he paid \$320 for the flour, how many barrels of each kind did he buy?

7. (a) Raise to the power indicated: $(1+x^2y^2)^4$.

(b) Extract square root of: $x^2+xy+\frac{1}{4}y^2$.

8. Simplify: (a) $n\sqrt{a^x b^y}$; (b) $3\sqrt{\frac{a}{3b^2}}$

6

9. Solve: $\sqrt{x+8}$ $\sqrt{x+8}$ $\sqrt{\quad}$

10. A train started 16 minutes late, but finished its run of 120 miles on time by going 5 miles per hour faster than usual. What was its usual rate per hour?

NOTE.—Solve any seven. The whole work must be given.

READING

1. Name two necessary qualifications of a successful teacher of reading.
2. (a) What is reading? (b) What is the best method of teaching beginners? Give reasons for your answer.
3. Tell how you would conduct a reading lesson in the fifth grade.
4. Define pitch.
5. How should supplementary matter be used in reading?

ELEMENTARY AGRICULTURE

Select any nine of the following twelve questions:

1. What part of the plant is derived from (a) the soil, (b) the air?
2. What are the uses of soil moisture?
3. What effect has temperature on the absorbing power of the root?
4. Name the ways in which soil moisture may be depleted.
5. How should seed corn be selected?
6. What kind of soil is best suited to the corn plant?
7. What constitutes an ideal or perfect ear of corn?
8. How does the clover plant benefit farm land?
9. What effect has humus on sandy soils?
10. Name some animals that are beneficial to plants.
11. What are the advantages of crop rotation?
12. What effect has oxygen on the germination of seeds?

PHYSICAL GEOGRAPHY

Select any nine of the following eleven questions:

1. What is the solar system?
2. State the composition of air.
3. Why is the land more susceptible to change in temperature than the water?
4. What and where are the horse latitudes?
5. In the region of what regular winds is most of the United States?
6. Describe formation of soil.
7. What changes in soil, climate and occupation would be noted in a journey from Norfolk, Va., to Cincinnati, Ohio?
8. State cause and effect of mountains.
9. What are the causes and effect of ocean currents?
10. What effect has climate on man?
11. What is the origin of the Philippine Islands?

ENGLISH HISTORY

Select any seven of the following ten questions:

1. (a) Give brief account of the manners and customs of the Britons at the time of the Roman invasion. (b) Give brief account of the Roman withdrawal in 448 A. D.
2. (a) Give an account of the Saxons, whence, why, when and how they came to Britain. (b) Why called Anglo-Saxons?
3. (a) Give brief account of Richard the Lion-hearted. (b) Give brief account of Joan of Arc.
4. (a) Tell what is meant by the War of the Roses. (b) What romantic event terminated the war?
5. Outline the leading facts of the reign of Henry VIII.
6. (a) Name three great writers of Queen Elizabeth's reign. (b) What famous book-translation was made during the reign of James I?
7. (a) Where did the Sepoy rebellion take place? (b) State cause and results.
8. Discuss England's policy as regards a navy and standing army.
9. (a) Name the three kings of England you consider the greatest and give your reasons. (b) Name the two queens of England you consider the greatest and give reasons.
10. (a) What has been England's commercial policy—Free-trade or Protection? (b) Why?

GENERAL HISTORY

Select any seven of the following ten questions:

1. What three great empires grew up in the Tigris-Euphrates basin?
2. A few words about each of the following: (a) Cyrus the Great; (b) Croesus; (c) Xerxes; (d) Arbela; (e) Solon.
3. State the causes of the decline and downfall of the Greek republics.
4. Name the nations involved in the battle of Tours and show what effect this battle had upon European civilization.

5. State the effects of the battle of Chalons upon European history.
6. A few words about each of the following: (a) Cannae; (b) Hannibal; (c) Mark Anthony; (d) Augustus Cæsar; (e) Constantine the Great.
7. Give a brief sketch of the formation of the Romance languages.
8. Discuss the treaty of Verdun.
9. Sketch briefly the rise of Russia, naming the most important rulers.
10. Give cause and results of the Boer War.

REGULAR EXAMINATION, JULY, 1912

SCHEDULE FOR EXAMINATIONS

First Day

- 8:40 to 9:00—Filling in Form E, No. 2—Writing to be graded on Form E, No. 2
- 9:00 to 10:40—Geography
- 10:40 to 12:40—Grammar and Composition
- 12:40 to 1:40—Intermission
- 1:40 to 2:20—Spelling
- 2:20 to 3:40—Theory and Practice
- 3:40 to 5:00—Civil Government

Second Day

- 9:45 to 12:00—Arithmetic
- 12:00 to 1:00—Virginia History
- 1:00 to 2:00—Intermission
- 2:00 to 3:00—Physiology and Hygiene
- 3:00 to 4:30—United States History

Third Day

- 9:00 to 10:45—Algebra
- 10:45 to 11:30—Reading
- 11:30 to 1:00—Science
- 1:00 to 2:00—Intermission
- 2:00 to 3:30—History, English or General

GEOGRAPHY

(Select eight questions and no more. If more than eight questions are answered, only the first eight answers will be valued.)

1. (a) What is the amount of the inclination of the earth's axis? (b) What is the effect of the inclination of the earth's axis?
2. (a) Name the zones. (b) Tell briefly of plant and animal life in each zone.
3. (a) Name and locate the races of mankind. (b) Name the chief religions of the world.

4. (a) What is the difference between foreign and domestic commerce?
(b) What constitute the principal highways of trade?
5. (a) Name the republics of Europe. (b) Locate—(1) Corsica; (2) Straits of Dover; (3) Bay of Biscay; (4) Strait of Gibraltar; (5) Ural Mountains.
6. (a) Name the States of the United States that border on the Gulf of Mexico; the Pacific Ocean. (b) Locate—(1) Lake Champlain; (2) Great Salt Lake; (3) Yellowstone Park; (4) Lake Itasca; (5) Niagara Falls.
7. Name the insular possessions of the United States and tell how each was acquired.
8. (a) What river separates the United States from Mexico? (b) Name the republics of Central America and state which is the most important to us. Why?
9. (a) Name the chief mountains of Europe and Asia, and tell in what general direction they trend. (b) Name three important rivers in each continent, and tell in which direction they flow, and into what they empty.
10. Give the following information about Virginia: (1) Area; (2) Population in 1900; (3) Navigable rivers; (4) Mountains; (5) Cities.

GRAMMAR AND COMPOSITION

(Select ten questions and no more. If more than ten questions are answered, only the first ten answers will be valued.)

1. Punctuate the following letter:

Richmond Virginia August 1 1912

Mr. Harvey Myers
Seattle Washington
My dear Sir

Please report to my office for work next Monday at nine A M
Yours very truly

John Jones

2. Punctuate the following sentences and give the reasons for each mark of punctuation used:
 1. The wind being favorable they embarked.
 2. We went to Vienna the capital of Austria.
 3. I see my good friend that you are in the wrong.
 4. If that is true said he I am lost.
 5. During my senior year I studied Latin, Greek and chemistry.
3. Write a paragraph of at least one hundred words on the following subject: The Teacher in His Relation to the Community.
4. Correct the errors in the following sentences and give the reason for each correction:
 1. She prepared a lunch for my brother and I.
 2. She is not so clever as him.
 3. What do you think of him studying Latin?
 4. The rain has lain the dust.
 5. Mother laid on the sofa yesterday.

5. Write the possessive singular and the possessive plural of the following words: boss, lady, son-in-law, monkey, deer.
6. Classify the phrases in the following sentences both as to form and as to use:
 1. We hear the sound of distant footsteps.
 2. Crowds came to behold the sights.
 3. Looking upward, they beheld the cause that gave the trouble.
 4. We hope to hear the speaker.
 5. He has houses to rent.
7. Give the objective forms of *I*, *thou*, *we*, *she* and *who* and use them in sentences.
8. Compare the following adjectives: fortunate, bad, fore, late, little.
9. You take my house when you do take the prop that doth sustain my house; you take my life when you do take the means whereby I live.
 1. Name the above sentence with regard to form.
 2. Name the part before the semicolon with regard to form.
 3. Write the subordinate clauses and classify them according to use.
10. Use the following verb-forms in sentences with *he* as the subject:
 1. The present perfect progressive indicative of *love*.
 2. The present passive indicative of *love*.
 3. The present perfect potential passive indicative of *love*.
 4. The past subjunctive, common form, of *to be*.
 5. The past indicative, common form, of *set*.
11. Use the past-tense forms and the past particles of the following verbs in sentences: eat, drink, rise, raise, take.
12. Be good, sweet *maid* and let who will be clever;
Do noble things, do not dream *them* all *day* long;
And so make *life*, death, and that vast forever
One grand sweet *song*.
Give the case and the construction of each *italicized* word in the above sentence.

SPELLING

- | | | | |
|-----------------|----------------|---------------|----------------|
| 1. exemplary | 11. corridor | 21. gangrene | 31. brilliant |
| 2. lineage | 12. decrepit | 22. paregoric | 32. prejudice |
| 3. crematory | 13. inquiry | 23. ipecac | 33. jaundice |
| 4. lamentable | 14. gigantic | 24. cyclone | 34. syringe |
| 5. illumination | 15. opponent | 25. apparatus | 35. precede |
| 6. ultimatum | 16. illustrate | 26. calamus | 36. proceed |
| 7. vehement | 17. ridicule | 27. brunette | 37. eminent |
| 8. nihilist | 18. fictitious | 28. pinnacle | 38. imminent |
| 9. deficit | 19. fallacy | 29. impromptu | 39. metropolis |
| 10. ominous | 20. monetary | 30. bounteous | 40. supervise |

THEORY AND PRACTICE

(Select eight questions and no more. If more than eight questions are answered, only the first eight answers will be valued.)

1. In what ways does scholarship aid the teacher?

2. What opportunities for professional growth are open to the teacher?
3. What are the five main functions of the teacher?
4. Why should the State maintain a free school system?
5. Give two definitions of education.
6. What subjects should be correlated with history?
7. Give three rules for the teacher to observe in the schoolroom to secure good hygienic conditions.
8. What are the objects of the recitation?
9. Show how gradation and the assignment of lessons are related to the "average pupil."

CIVIL GOVERNMENT

(Select six questions and no more. If more than six questions are answered, only the first six answers will be valued.)

1. (a) State how the Presidential electors are elected. (b) How many electors has Virginia?
2. (a) How often and when does Congress meet? (b) What power has the Speaker of the House over legislation?
3. Describe the process of assessing property for the purpose of taxation.
4. From what two sources does the national government derive its revenue?
5. What are the functions of the weather bureau; and (b) which executive department of the national government has control of it?
6. (a) How is the presiding officer of the Senate chosen? (b) House of Delegates?
7. (a) Explain how school trustees are elected. (b) What are their duties?
8. (a) How are new States admitted into the Union? (b) Name three county officers who are required to give bond.

DRAWING

1. Draw simple landscape including view of schoolhouse in which you were once a pupil.
2. Name ten objects in which the cylinder is the basal part.
3. How would you teach drawing in connection with language?
4. Sketch a boy rolling a hoop.

ARITHMETIC

(Select ten questions and no more. If more than ten questions are answered, only the first ten answers will be valued.)

1. Reduce to its simplest form $\frac{2/3 + 3/7}{7 - 4/5} \div \frac{2/9}{2 + 1/2}$
2. 20 3-4 is the product of three factors. Two of the factors are 13-5 and 4 5-8. Find the other factor.
3. If the dividend is 807 and the quotient 34 1-3, what is the divisor?

4. Coal sells at \$5.75 a ton. What will be the cost of 2,315 lbs. at this rate?
5. A man is hired to dig a cellar 20 feet by 15 feet by 5 feet. How much money will he receive at 30 cents a cubic yard?
6. A pavement is 51-3 rods long and 8 feet 6 inches wide. What did it cost at \$1.40 per square yard?
7. A miller charges 1-16 for toll. How many bushels of wheat must one take to mill to get 12 barrels of flour, each containing 196 pounds, if a bushel of wheat makes 40 pounds of flour.
8. Multiply 8.035 by .0035, add 3 to the product and divide the sum by .000625.
9. A man sold two lots each for \$600, gaining 20 per cent. on one, and losing 20 per cent. on the other. What was his gain or loss?
10. What is the interest of \$475 for 1 year, 3 months, 24 days at 6 per cent.
11. The tax on property assessed at \$8,500 is \$48.37. What is the rate on \$1,000?
12. 160 rods of fence will enclose how many acres in the form of a square?

VIRGINIA HISTORY

(Select four questions and no more. If more than four questions are answered, only the first four answers will be valued.)

1. What events are suggested by the following names and dates:
(a) Capt. John Smith, 1607; (b) Jamestown, July 30, 1619; (c) Capt. Davies, 1652; (d) Williamsburg, 1676; (e) George Washington, July 9, 1755?

Tell what is meant by the following expressions: (a) Representative Government; (b) Civil Liberty; (c) Religious Liberty; (d) Puritan; (e) Cavalier.

2. Name three colonial Governors of Virginia and give one important event in the administration of each.

Name five Virginians who rendered memorable service during the Revolutionary Period and name one thing done by each to aid the cause of Liberty.

3. Tell something that each of the following Virginians did for his country after the Revolution was over:

(a) Washington, (b) Jefferson, (c) Madison, (d) Marshall, (e) Randolph.

Write not more than 100 words on social conditions in Virginia prior to the Civil War.

4. Tell what is meant by the following expressions:

(a) Abolitionist, (b) Secessionist, (c) States Rights, (d) Emancipation, (e) Reconstruction.

Name five battles of the Civil War fought on Virginia's soil in which the South was victorious.

5. Name one public office held by each of the following Virginians: (a) William H. Ruffner, (b) Fitzhugh Lee, (c) John W. Daniel, (d) G. W. Kolner, (e) J. D. Eggleston.

PHYSIOLOGY AND HYGIENE

(Select seven questions and no more. If more than seven questions are answered, only the first seven answers will be valued.)

1. In what way are house flies a menace to health, and how may they be exterminated?
2. (a) Discuss the importance of disinfection. (b) Mention three natural disinfectants and three of the most useful chemical disinfectants.
3. What is the proper temperature for a schoolroom? In the absence of a specially constructed system of ventilation, what are the most practical means of ventilation?
What can teachers accomplish toward promoting public health?
4. Discuss the influence on public health of unhygienic habits of an individual.
5. What diseases result from impure milk, and how may farmers and dairy-men help prevent them?
What are the causes and results of polluted drinking water?
6. How may typhoid fever be caused and prevented?
7. What are the evil consequences of dust in the schoolroom, and how may they be abated?
Discuss briefly five requisites of a sanitary school.
8. In your opinion, what are the three greatest medical discoveries of modern times, and who made them?
9. What is the government of Virginia doing to promote public health, and who is the leader in this work?

UNITED STATES HISTORY

(Select eight questions and no more. If more than eight questions are answered, only the first eight answers will be valued.)

1. (a) When and where did the first legislative body in America assemble?
(b) What object did Hudson have in view in his voyage which resulted in the discovery of the Hudson river?
2. (a) What led to the settlement of Rhode Island? (b) What was the attitude of the Rhode Island settlers toward religious liberty?
3. Contrast briefly the social conditions in New England and in the South before 1763.
4. (a) Describe the method by which the State ratified the Constitution after its formation and adoption? (b) How many States had to adopt the Constitution before it went into effect?
5. During Washington's administration, what measures separated the country into two distinct political parties?
6. (a) What period is known as the "Era of Good Feeling." (b) What is meant by the Monroe Doctrine?
7. What is the "Doctrine of Nullification" and what gave rise to it?
8. What were the objections in the North to the admission of Texas to the Union?
9. Discuss briefly the Dred Scott case.

10. Mention one event for which the following are famous: Henry Clay, Andrew Jackson, the Wright Brothers, Woodrow Wilson, Oliver H. Perry.

ALGEBRA

(Select seven questions and no more. If more than seven questions are answered, only the first seven answers will be valued.)

1. Add: $\frac{1}{2}a - \frac{1}{3}b - \frac{1}{4}c$ and $-\frac{1}{2}a + \frac{1}{3}b - \frac{1}{4}c$.
2. From O subtract the sum of $4a^2$ and $3a - 5a^2 - 1$.
3. Multiply $a+3$, $a+4$ and $a-5$.
4. Divide $30x^2 - 53 \times 8$ by $6x - 1$.
5. Extract the square root of the following: $1 - 4a + 2a^2 + 4a^3 + a^4$.
6. A can do a piece of work in 2 2-5 hours, and B in 4 1-2 hours. In how many hours can the work be done by both working together?
7. A's age is twice the sum of the ages of B and C; two years ago A was four times as old as B, and four years ago A was six times as old as C. Find their ages.
8. The perimeter of a rectangular field is 180 feet, and its area 1,800 square feet. Find its dimensions.
9. The sum of the squares of two numbers is 61 and the product of their squares is 900. Find the numbers.

READING

(Select four questions and no more. If more than four questions are answered, only the first four answers will be valued.)

1. Give three essentials of good reading.
2. What are two primary purposes of a reading book?
3. State two advantages of drill on pronunciation and articulation before a reading lesson.
4. Give a remedy for the "one-tone-drag-way" some pupils have in reading.
5. What method do you favor in teaching beginners to read? Why?

AGRICULTURE

(Select nine questions and no more. If more than nine questions are answered, only the first nine answers will be valued.)

1. What agencies are active in soil formation?
2. How does the plant influence or modify the soil?
3. Name the benefits to the soil from the work of the earthworms.
4. What are the objects of tillage?
5. How do weeds injure the farm and garden?
6. What are the leading kinds of enemies of plants?
7. How does the plant influence or modify the climate?
8. What are the effects of lime upon the soil?
9. State how weight, color and age affect the value of seeds.
10. What insects are harmful or detrimental to the orchard?
11. Give some reasons why sheep should be more largely kept.
12. What are the objects of pruning?

PHYSICAL GEOGRAPHY

(Select nine questions and no more. If more than nine questions are answered, only the first nine answers will be valued.)

1. What evidence is there that the interior of the earth is hot?
2. How does the rotation of the earth affect the winds?
3. What are deltas?
4. What is the cause of salt lakes?
5. State some beneficial effects of volcanoes.
6. What is climate?
7. Explain the formation of (a) dew; (b) frost.
8. Explain the origin of salt beds in deserts.
9. Where is the heaviest rainfall in the United States?
10. How are plants distributed?
11. Why are the least civilized people found in the tropical zone?

ENGLISH HISTORY

(Answer seven questions and no more. If more than seven questions are answered, only the first seven answers will be valued.)

1. (a) How was Christianity introduced into England? (b) Who was St. Augustine?
2. Give an account of the cause and result of the Norman Conquest.
3. What is meant by the Plantagenets?
4. Give the main facts leading up to the establishment of the Commonwealth.
5. Give a brief account of the Stuart restoration.
6. (a) What was England's policy in governing her American colonies (1775)? (b) What is her present policy in governing Canada?
7. (a) Give brief account of Father Mathew's work for temperance. (b) Give brief account of the Crimean War.
8. Compare the reign of Alfred with that of King John.
9. Give brief outline of the life and the reign of Queen Victoria.
10. (a) What is England's policy—protection or free-trade? (b) Explain the reasons for your answer.

GENERAL HISTORY

(Answer seven questions and no more. If more than seven questions are answered, only the first seven answers will be valued.)

1. Name and define the forms of Egyptian script.
2. A few words about each of the following:
(a) The Maccabees, (b) Periander, (c) Darius, (d) Themistocles, (e) Thermopylæ.
3. State the causes and effects of the Peloponnesian War.
4. Compare the material power and resources of Rome and Carthage.
5. Define and give a brief sketch of the workings of Feudalism.
6. State the effects of the Crusades upon the native literatures and the intellectual life of Europe.

7. State briefly the provisions of the Peace of Westphalia.
 8. A few words about each of the following:
(a) Gustavus Adolphus, (b) Robespierre, (c) Austerlitz, (d) Trafalgar,
(e) Garibaldi.
 9. State the terms of the treaty between France and Germany at the close of the Franco-Prussian War.
 10. Discuss briefly the Liberal Movement in Russia.
-

Examination Professional Course, July, 1912

Third Year

UNITED STATES HISTORY

1. When, where, by whom and for what reason were each of the following colonies settled: Virginia, Massachusetts, Georgia, New York and Pennsylvania?
2. Discuss slavery in the thirteen original colonies prior to 1800: (a) As to extent; (b) effect on social and economic conditions.
3. Outline your plan for teaching the campaign which resulted in the capture of the Northwest Territory.
4. What is meant by the Critical Period in American history and why so called?
5. What were the Alien and Sedition Laws and what was the effect of their adoption?
6. Give a brief synopsis of the Dred Scot decision, and tell of its effect upon public sentiment in the North.
7. Give approximately dates and causes of two panics, and state the question now confronting the people of the United States as a result of the two most recent panics.
8. State the substance of the twelfth amendment to the Constitution and give a reason for its adoption.
9. (a) Tell briefly of the growth and development of railroads in the United States. (b) Why was it necessary to curb the power of the railroads, and what agency of government was created by the Congress to secure this control?
10. State two leading issues in the approaching Presidential campaign, and give briefly the position taken by each of the two leading parties on these issues.

HISTORY OF EDUCATION

1. (a) Give the definition of education used by any two of the following: Plato, Herbert Spencer, Pestalozzi, Milton. (b) How are these definitions of value to teachers today?
2. (a) What were the educational views held by Washington, Jefferson, Madison? (b) To what extent do you agree with their views?

3. Compare old education with new education as to the teacher, the studies and the ideals.
4. Trace the effect of psychological, scientific and sociological tendencies in education on the present eclectic tendency in education.
5. (a) Mention some new things undertaken in the schools of today. (b) Why is it a mistake to attempt to abolish all former customs in order to introduce the new things?

NATURAL SCIENCE

1. Give life history of mosquito and state method of fighting it.
2. How would you distinguish a moth from a butterfly?
3. Name and describe the two most poisonous wild plants of Virginia.
4. Name ten wild plants that bloom in March or April in Virginia.
5. Describe the cocoon and caterpillar of any moth with which you are familiar. (Polyphemus Luna, etc.)
6. Describe the robin and give its habits.
7. Show how San Jose' scale may be checked.
8. How can you tell eggs of toads from those of frogs?
9. Explain how the life story of the earthworm can be studied objectively in schoolroom.
10. Draw leaf of one tree given below and describe its flower and fruit; also give tree's habits and use of wood: White elm, red maple, willow oak, tulip poplar, linden, beech.

LITERATURE

1. Name the authors of the following books: Knickerbocker's History of New York, The Last of the Mohicans, The House of Seven Gables, The Autocrat of the Breakfast Table, The Innocents Abroad, Ben Hur, The Little Shepherd of Kingdom Come, Richard Carvel, To Have and to Hold, Uncle Remus.
2. Give the authors and the themes of following poems: Maud Muller, The Chambered Nautilus, Thanatopsis, A Psalm of Life, Lenore.
3. Write a sketch of Longfellow's Life.
4. Give the theme, metre and setting of "Evangeline." Scan the first line of the poem.
5. Trace the wanderings of Evangeline in search of her lover Gabriel.
6. Write a sketch of Lowell's life.
7. Give the story of the "Vision of Sir Launfal" and make the lesson of the poem stand out clearly.
8. Give the metre, tone and general plan of The Raven. Scan the first two lines.
9. Name ten of the best writers belonging to the Age of Romanticism.
10. Who wrote the following poems: Canterbury Tales, Færie Queene, Comus, Alexander's Feast, The Rape of the Lock, The Cotter's Saturday Night, The Lady of the Lake, Ode on Intimations of Immortality, Sohrab and Rustum, in Memoriam.

CIVIL GOVERNMENT

1. (a) Tell the origin and development of the town as a unit of government; (b) county.
 2. (a) Give illustrations of the exercise of Federal government, State government, local government, in your county or city. (b) The officers of which government seem most sensitive to local opinion.
 3. Should an elementary education be given in this country at public expense? Give reason for your answer.
 4. State the advantages or disadvantages of a strong centralized government like that of Russia, compared with a government like that of the United States.
 5. Compare the powers of the English Parliament with the powers of the Congress of the United States.
 6. Mention five things that the Constitution of the United States forbids the States to do, and give a reason for each.
 7. Describe the process of transferring a title to real estate in this State.
 8. (a) What is meant by the Australian ballot? (b) Explain its advantages.
 - 9 (a) Name the qualifications, in general, for voting. (b) Who prescribes these qualifications? (c) Why is registration a qualification?
 10. Describe the successive steps in nominating and electing a candidate for the Presidency.
-

Examination of State Reading Course

(1911-1912)

THE HEALTH INDEX OF CHILDREN

(Select five questions and no more. If answers are given to more than five questions, only the first five answers will be valued.)

1. Define adenoids and tell how they may be detected.
2. Name the common defects of vision.
3. Give results caused by defective teeth.
4. Write a short paragraph on sanitation.
5. Mention some causes for temperamental characteristics of children.
6. How does posture influence the health of the child?
7. Give a classification of foods for children.
8. Discuss the health of children at home in relation to school health.
9. To what degree does the health of teacher affect the school system?
10. What do you think of the author's plan for health supervision?

COLGROVE'S THE TEACHER AND THE SCHOOL

(Select five questions and no more. If answers are given to more than five questions, only the first five answers will be valued.)

1. Explain the relationship between scholarship and professional training.

2. Explain four methods of studying children.
3. Outline the six groups of subjects in an elementary course of study.
4. What is to you an ideal plan for determining whether pupils should or should not be promoted to a higher class or group?
5. Make out your ideal of a daily program for a schoolroom containing the third and fourth grades under one teacher.
6. Discuss the proper care of children's eyes.
7. Discuss the principles which should govern the teacher's daily preparation for her school work.
8. How can teachers guide the pupils' study of their lessons, both in school and in home?
9. How can teachers develop good habits in their pupils?
10. What is good order in a schoolroom?

THE AMERICAN RURAL SCHOOL

(Select five questions and no more. If answers are given to more than five questions, only the first five answers will be valued.)

1. State some causes of the conditions of rural schools, and how these conditions may be improved.
2. Write a short paragraph on "rural school supervision."
3. What are some qualifications of a teacher (natural, acquired)?
4. How do salaries of teachers compare with the salaries of other workers?
5. What, in your opinion, would be a model rural school?
6. What can the individual teacher do?
7. Tell how nature study may aid the rural child.
8. What is the dominant interest in the rural community, and what place should it occupy in school work?
9. Write a short paragraph on "rural school libraries."
10. Discuss briefly "consolidation."

HISTORY OF EDUCATION

1. (a) Give the definition of education used by any two of the following: Plato, Herbert Spencer, Pestalozzi, Milton. (b) How are these definitions of value to teachers today?
2. (a) What were the educational views held by Washington, Jefferson, Madison? (b) To what extent do you agree with their views?
3. Compare old education with new education as to the teacher, the studies, and the ideals.
4. Trace the effect of psychological, scientific and sociological tendencies in education on the present eclectic tendency in education.
5. (a) Mention some new things undertaken in the schools of today. (b) Why is it a mistake to attempt to abolish all former customs in order to introduce the new things?

State Summer Normal Schools

REPORTS OF CONDUCTORS—1912

For White Teachers

Big Stone Gap, July 3 to August 2, 1912

OFFICERS AND FACULTY

Conductor, J. N. HILLMAN

Local Manager, H. H. YOUNG

Subjects Taught

Instructors

Arithmetic and Algebra.....	F. W. Taylor
English Grammar	Miss Lavinia Critz
English History, Spelling and English	
Composition	Miss Willie London
Theory and Practice.....	J. N. Hillman
Drawing	Miss Minnie Thomas
Agriculture and Civil Government....	A. W. Stair
United States and General History....	R. M. Addington
Virginia History	J. E. Carter
Physiology and Hygiene.....	Miss Jessie P. Nidermaier
Reading and Primary Methods.....	Miss Annabel Wood
Domestic Science and Manual Training	Miss Virginia Caldwell
Manual and Physical Geography,.....	H. C. Williams

Lecturers

Subjects

Dr. Douglas Freeman.....	Public School Sanitation
Mrs. L. R. DaShiell.....	School Improvement Leagues
Mrs. M. M. Caldwell.....	Civics and Improvement
Dr. J. P. McConnell.....	Industrial Education

General Remarks

This was the first State summer normal held at St. Paul School. Twenty-three of the teachers who came to us held no certificate whatever, and many

of them had never attended a normal. Thirty-six took the examinations for certificates at the close of normal, which clearly indicates that passing these examinations was the object in view. Both instructors and teachers were so anxious to do all the work possible that the Saturdays were used for regular work.

The exercises of each day began at 7:15 A. M. and continued until 5 P. M., with an intermission of one hour for dinner.

We have been advised by a number of teachers in North Carolina and Virginia that they would have come to us if they had known about the normal sooner.

W. B. VALENTINE,
Local Manager.

JAMES S. RUSSELL,
Conductor.

Virginia Union University, June 19 to August 2, 1912
